

Mathematics Calculation Policy

Tillington Manor Primary School

Document Control Table

Title	Tillington Manor Mathematics Calculation Policy
Author	Chris Tucker (Maths Lead)
Date Approved	
Approved By Name	Simon Rowland (Chair of Governors)
Next Review Date	September 2026

Document History

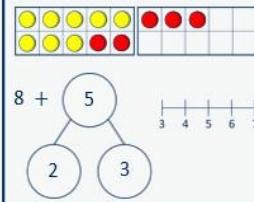

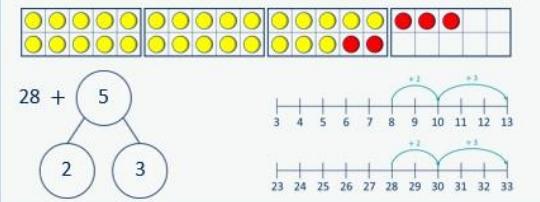

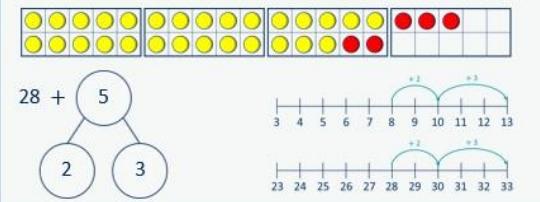

Guidance for teachers

The calculation policy is divided into four sections: addition, subtraction, multiplication and division. At the start of each section, you will find an overview of the progression of skills. Calculations involving decimal numbers and fractions are included.

The calculation policy follows the same concrete, pictorial, abstract approach as our main schemes of learning. Where appropriate, sentence stems and key questions are included alongside the key representations.

Where skills are divided into more than one section across the page, there is a progression in the level of difficulty from left to right. For example, when adding across a 10, children need to be able to add across 10 itself, before making links with related facts.

Add across a 10	... can be partitioned into ... and ...	I add ... to get to ... then I add ...
Partition the number you are adding to make a full ten.	 	$8 + 5 = 13$ $28 + 5 = 33$ 

Progression of skills - Addition

Year group	Skill
Nursery	<ul style="list-style-type: none">• Subitise to 3• Count how many• Make numbers to 5• Add 1 more (through songs and rhymes)
Reception	<ul style="list-style-type: none">• Conceptually subitise to 5• 1 more• Notice the composition of numbers within 10• Combine 2 groups• Add more
Year 1	<ul style="list-style-type: none">• Add together• Add more• Bonds within 10• Related facts within 20• Missing numbers

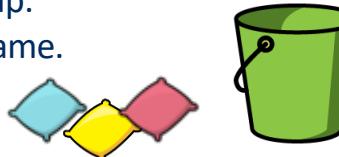

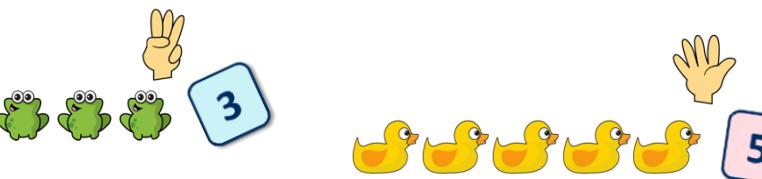

Progression of skills - Addition

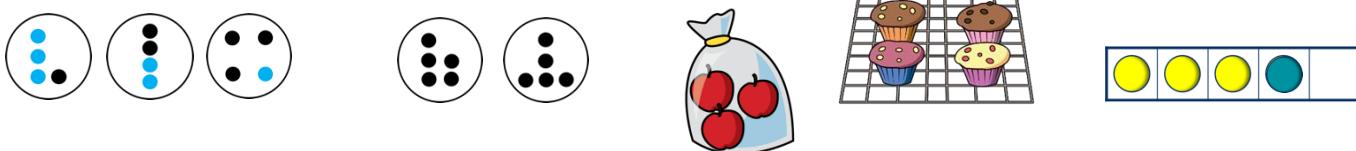

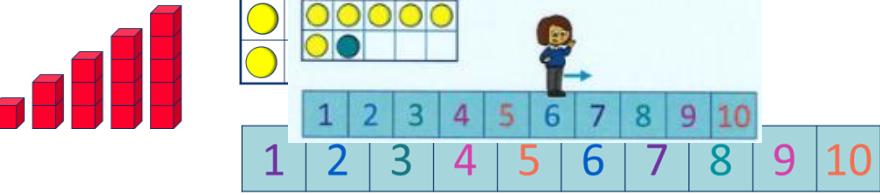

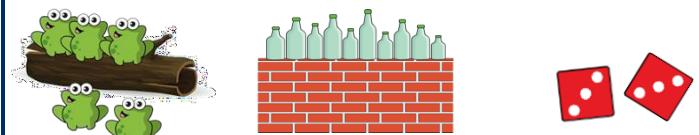

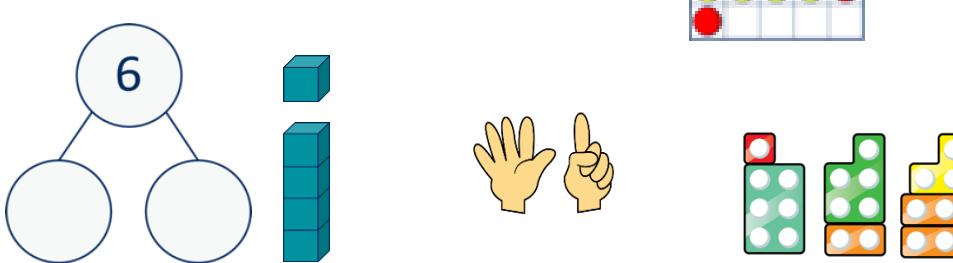

Year group	Skill
Year 2	<ul style="list-style-type: none">• Add 1s to any number (related facts)• Add three 1-digit numbers• Add across a 10• Add multiples of 10• Add 10s to any number• Add two 2-digit numbers (not across a ten)• Add two 2-digit numbers (across a ten)• Missing numbers
Year 3	<ul style="list-style-type: none">• Add 1s, 10s and 100s to a 3-digit number• Add two numbers (no exchange)• Add two numbers across a 10 or 100• Complements to 100• Add fractions with the same denominator within 1 whole• Calculate the duration of events

Progression of skills - Addition

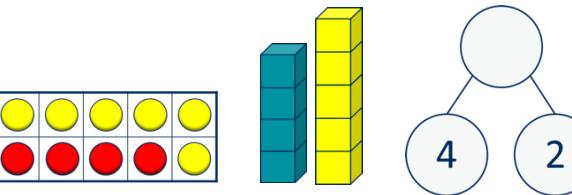

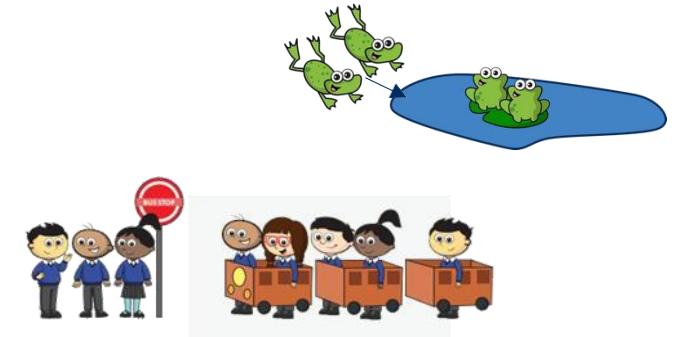

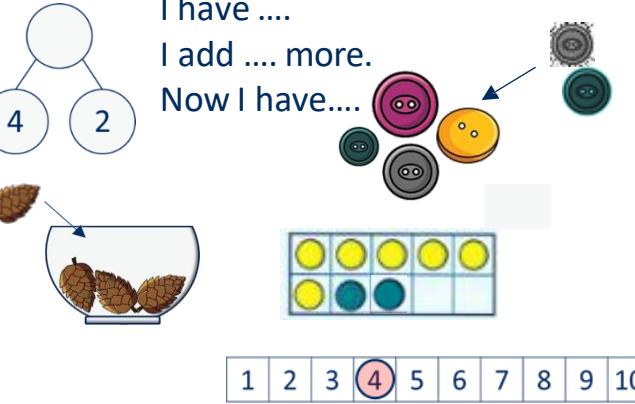

Year group	Skill
Year 4	<ul style="list-style-type: none">• Add 1s, 10s and 100s to a 4-digit number• Add up to two 4-digit numbers• Add decimal numbers in the context of money• Add fractions and mixed numbers with the same denominator beyond 1 whole
Year 5	<ul style="list-style-type: none">• Add using mental strategies• Add whole numbers with more than 4 digits• Add decimals with up to 2 decimal places• Complements to 1• Add fractions with denominators that are a multiple of one another
Year 6	<ul style="list-style-type: none">• Add integers up to 10 million• Add decimals with up to 3 decimal places• Order of operations• Negative numbers• Add fractions

Addition

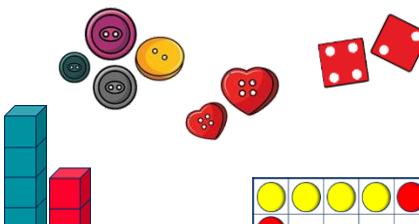

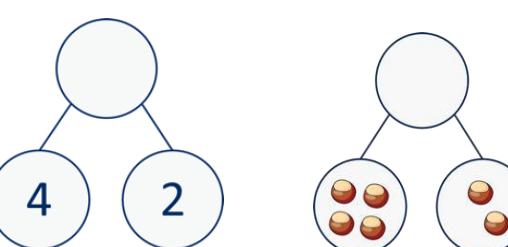

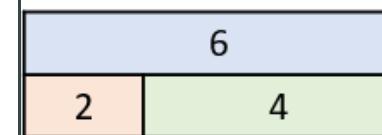

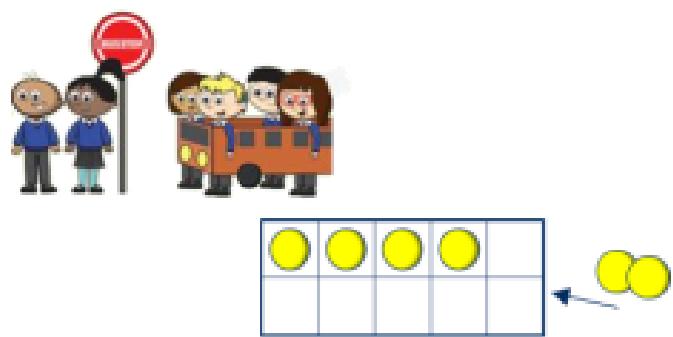

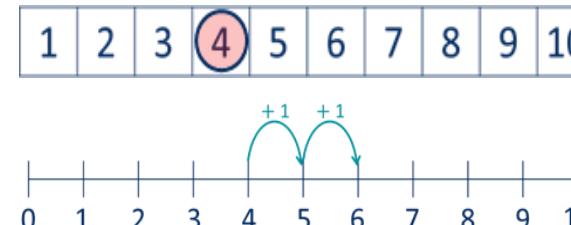

Nursery	<ul style="list-style-type: none"> • Begin to have an understanding of numbers to 5 • We recommend focusing on noticing and representing small quantities, perceptual subitising and counting.
Progression of skills	<h2>Key representations</h2>
Subitise to 3 Instantly see how many.	<p>How many do you see?</p> 
Count how many Begin to count objects using 1-1 correspondence.	<p>How many are there?</p> <p>1 2 3 4 5</p>  <p>Count out ... from a larger group. E.g. Collect 3 beanbags for a game.</p> 
Make numbers to 5 Start by showing 1, 2 and 3 using fingers.	<p>Show me...</p>   <p>Begin to link numerals to quantities.</p> 
Add 1 more Through stories, songs and rhymes.	<p>How many do I have now?</p> <p>Buzzy, Buzzy Bees</p> <p>Other add one on nursery rhymes.</p>  <p>One tomatoe, two tomatoes</p>

Reception	<ul style="list-style-type: none"> Have a deep understanding of numbers to 10, including the composition of each number. Subitise (recognise quantities without counting) up to 5 Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 and some number bonds to 10, including double facts.
Progression of skills	<h2>Key representations</h2>
Conceptually subitise to 5 Notice the parts that make up the whole.	<p>What do you see? How do you see it?</p> 
1 more Continue to link to stories, songs and rhymes.	<p>1 more than ... is ...</p> 
Notice the composition of numbers within 10 Link to stories, songs and rhymes.	<p>How many...? How many...? How many altogether?</p>  <p>How many ways can you make...?</p> 

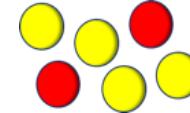

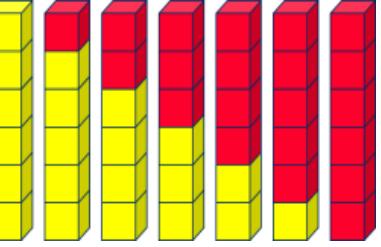

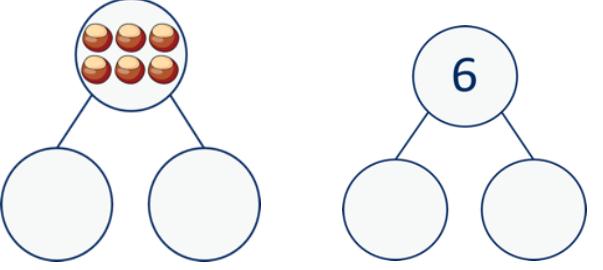

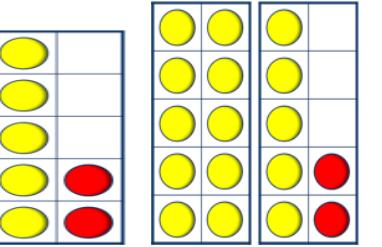

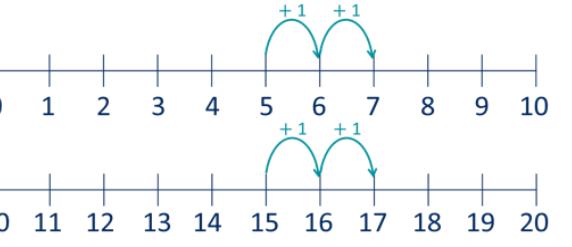

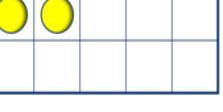

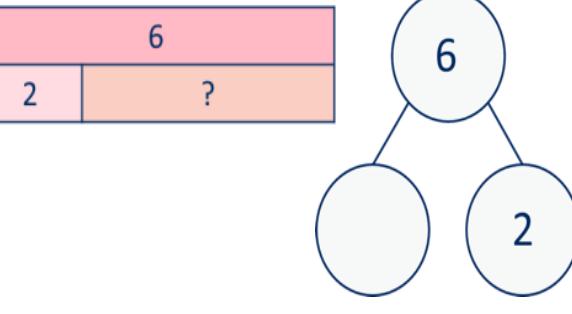

Addition

Progression of skills	Key representations		
Combine 2 groups 2 groups are combined to find the total.	<p>There are There are There are altogether.</p> 	<p>.... and make</p> 	
Add more A quantity is increased.	<p>First... Then.... Now....</p> 	<p>I have I add more. Now I have....</p> 	

Addition

Year 1	<ul style="list-style-type: none"> • Read, write and interpret mathematical statements involving addition (+) and equals (=) signs. • Represent and use number bonds within 20 • Add 1-digit and 2-digit numbers to 20, including zero. • Solve one-step problems that involve addition, using concrete objects and pictorial representations, and missing number problems such as $7 = \square + 2$
Progression of skills	<h2>Key representations</h2>
Add together (aggregation) 2 quantities are combined to find the total.	<p>There are ... There are ... There are ... altogether.</p>  <p>... is a part. ... is a part. ... is the whole. Push two parts up into the whole to show the aggregation.</p>  <p>... plus ... is equal to is equal to + ...</p> $4 + 2 = 6$ $2 + 4 = 6$ $6 = 4 + 2$ $6 = 2 + 4$ <p>*When looking at fact families, a bar model is a useful representation. *</p> 
Add more (augmentation) A quantity is increased.	<p>First... Then... Now...</p>  <p>I start at ... I jump on ... I land on ...</p>  <p><i>Explicitly teach number track/number line - How is it the same/different?</i></p> <p>... plus ... is equal to ... is equal to ... + ...</p> $4 + 2 = 6$ $2 + 4 = 6$ $6 = 4 + 2$ $6 = 2 + 4$

Addition

Progression of skills	Key representations		
<p>Bonds within 10 Include bonds for each number within 10 Encourage children to notice patterns.</p>	<p>... is made of ... and and ... make ...</p>  	<p>... can be partitioned into ... and ...</p> 	<p>... plus ... is equal to ...</p> $6 + 0 = 6$ $5 + 1 = 6$ $4 + 2 = 6$ $3 + 3 = 6$ $2 + 4 = 6$ $1 + 5 = 6$ $0 + 6 = 6$
<p>Related facts within 20 Make links to known facts.</p>	<p>I know that ... and ... = ... so ... and ... = ...</p> 	<p>... more than ... is ... so ... more than ... is ...</p> 	<p>What patterns do you notice?</p> $5 + 2 = 7$ $15 + 2 = 17$ $7 = 5 + 2$ $17 = 15 + 2$
<p>Missing numbers Make links to known facts.</p>	<p>How many more do you need to make ...?</p>  	<p>If ... is the whole and ... is a part, the other part must be...</p> 	<p>... plus ... is equal to ...</p> $2 + \square = 6$ $6 = 2 + \square$ 

Addition

Year 2

- Recall and use addition facts to 20 fluently, and derive and use related facts up to 100
- Add numbers using concrete objects, pictorial representations, and mentally, including:
 - a two-digit number and 1s
 - a two-digit number and 10s
 - 2 two-digit numbers
 - adding 3 one-digit numbers
- Recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.

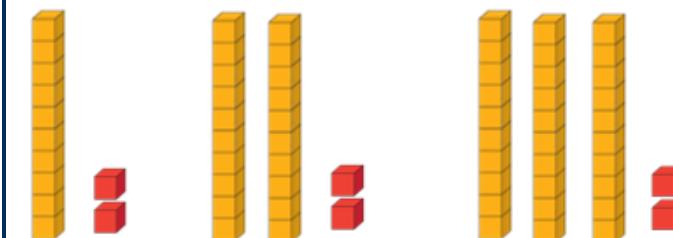

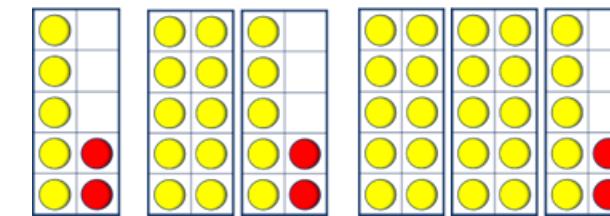

Progression of skills

Key representations

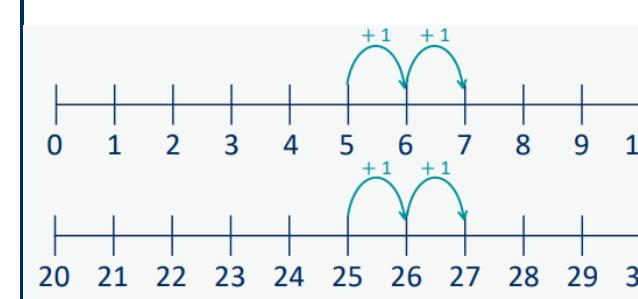

Add ones to any number
(related facts)

Make links to known facts.

I know that ... and ... = ... so ... and ... = ...

... more than ... is ...
so ... more than ... is ...

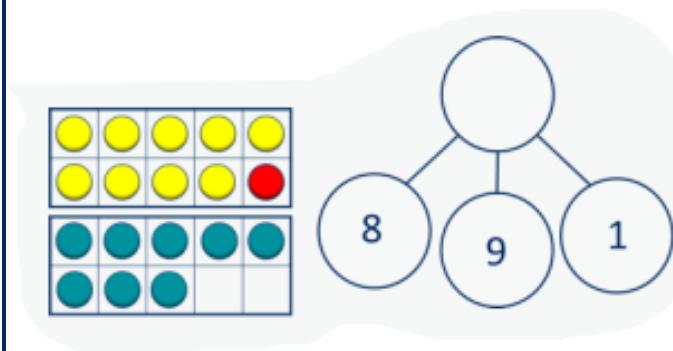

What do you notice? Can you continue the pattern?

$$\begin{aligned} 5 + 2 &= 7 \\ 15 + 2 &= 17 \\ 25 + 2 &= 27 \dots \end{aligned}$$

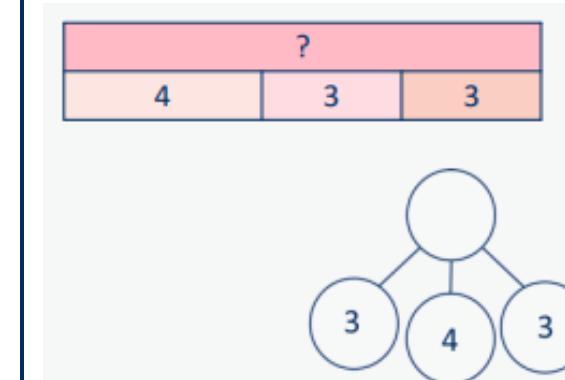

Add three 1-digit numbers

Prompt children to understand that addition can be done in any order and to make links to known facts.

and ... are a bond to 10
 $10 + \dots = \dots$

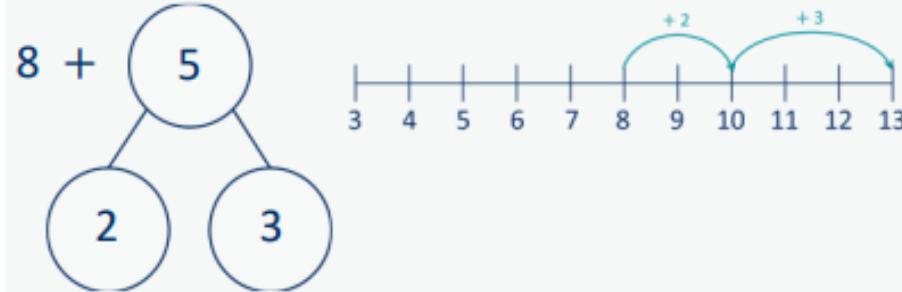

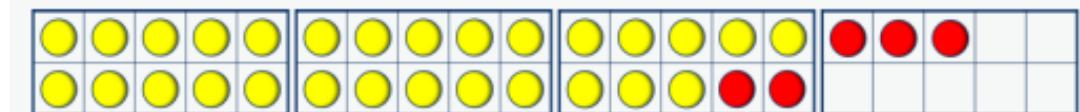

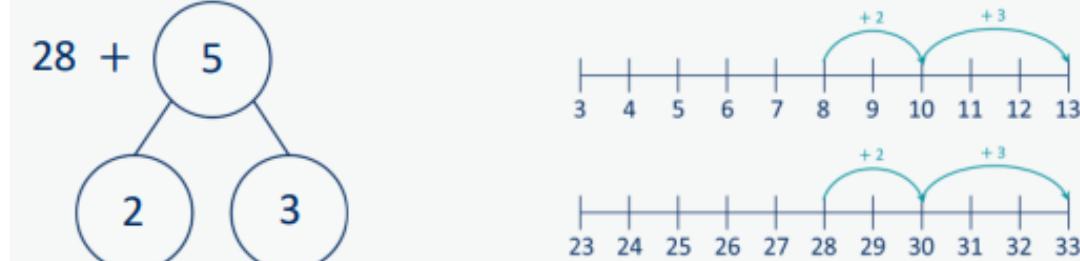

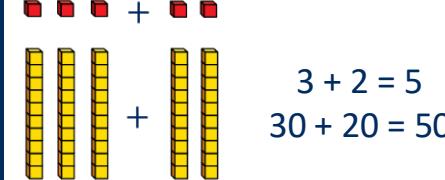

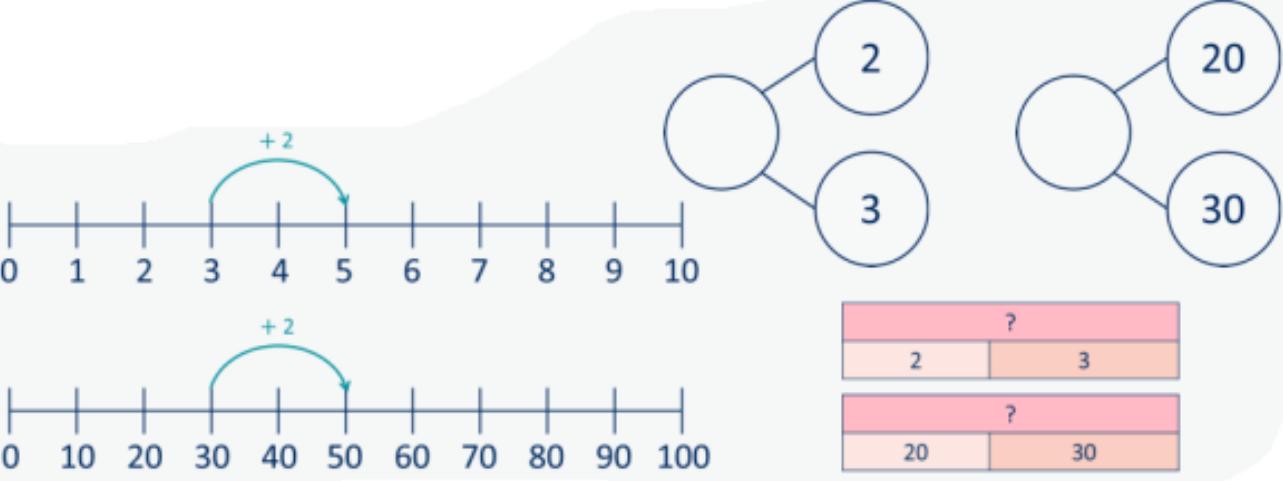

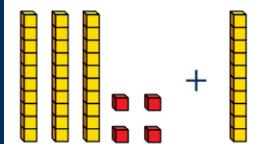

Double ... + ... = ...

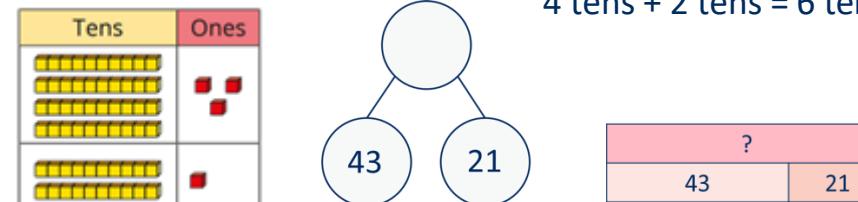

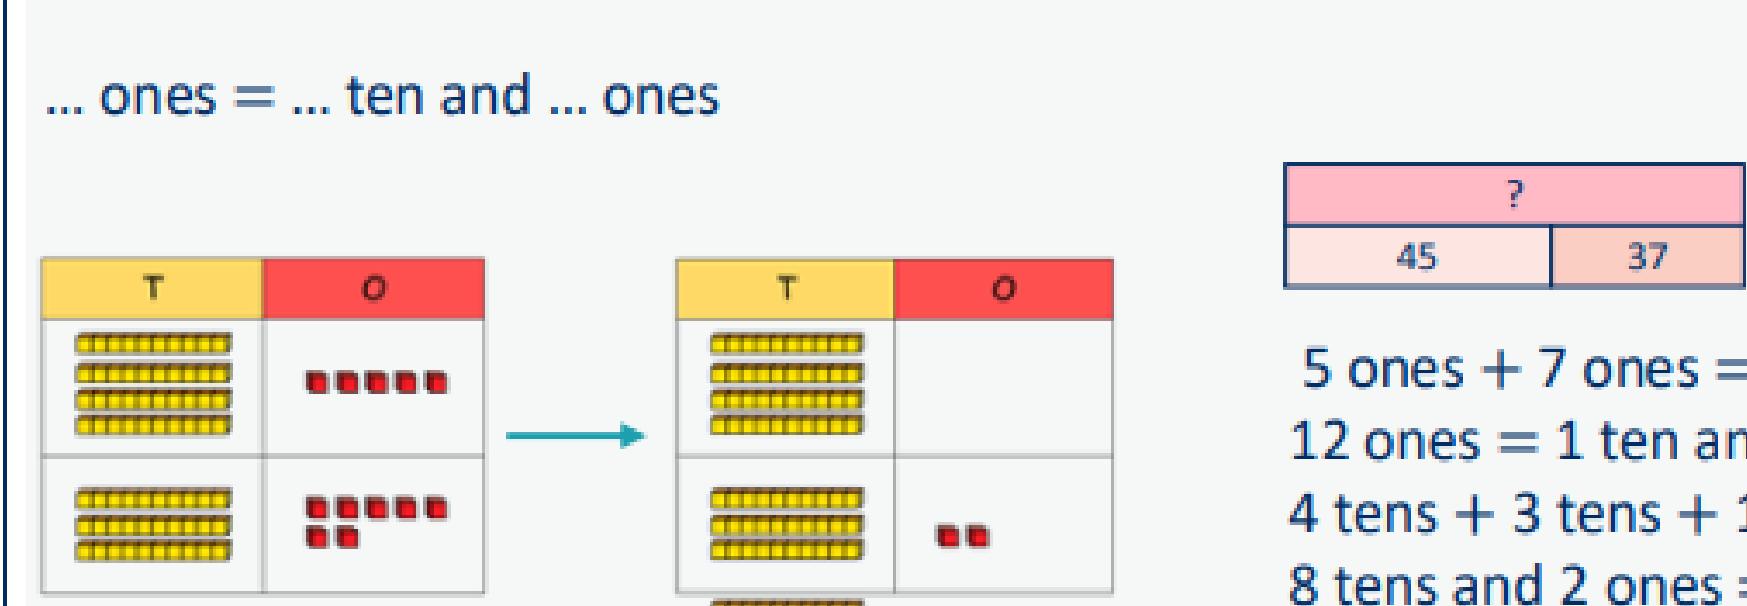

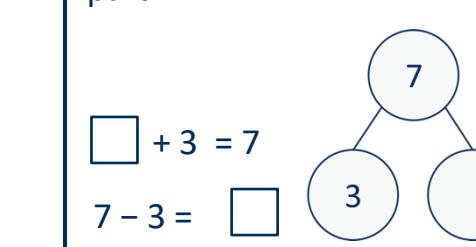

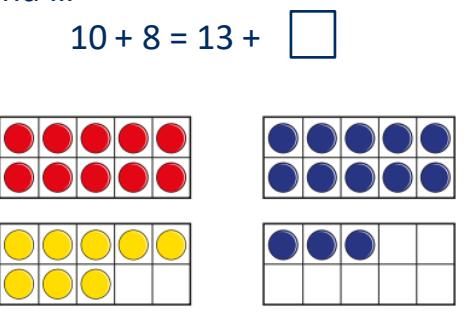

What do you notice? Which addition is the easiest to calculate?

$$\begin{aligned} 8 + 9 + 1 &= \\ 8 + 1 + 9 &= \\ 9 + 1 + 8 &= \end{aligned}$$

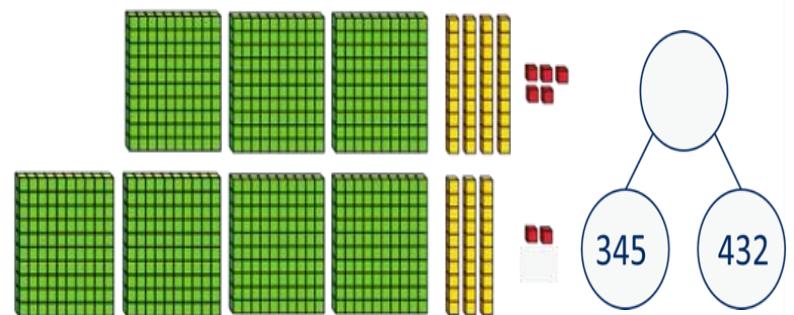

Addition

Progression of skills	Key representations																																																														
Add by making 10 Add across 10 Partition the number being added to make a full ten. (Please ensure that children are secure in their knowledge of number bonds to ten before this step.) Take time with this step (over several days)	<p>... can be partitioned into ... and ...</p>  	<p>I add ... to get to ... then I add ...</p> <p>$8 + 5 = 13$ $28 + 5 = 33$</p>  																																																													
Add multiples of 10 Make links to known facts within ten.	<p>... ones + ... ones = ... ones so ... tens + ... tens = ... tens</p> 	<p>If I know __, then I know __</p> <p>What is the same? What is different?</p> 																																																													
Add 10s to any number Make links to known facts.	<p>... tens + ... tens = ... tens ... tens and ... ones = ...</p> 	<p>To add ... I need to add 10 ... times.</p> <table border="1" data-bbox="1645 1688 2153 1936"> <tr><td>1</td><td>2</td><td>3</td><td>4</td><td>5</td><td>6</td><td>7</td><td>8</td><td>9</td><td>10</td></tr> <tr><td>11</td><td>12</td><td>13</td><td>14</td><td>15</td><td>16</td><td>17</td><td>18</td><td>19</td><td>20</td></tr> <tr><td>21</td><td>22</td><td>23</td><td>24</td><td>25</td><td>26</td><td>27</td><td>28</td><td>29</td><td>30</td></tr> <tr><td>31</td><td>32</td><td>33</td><td>34</td><td>35</td><td>36</td><td>37</td><td>38</td><td>39</td><td>40</td></tr> <tr><td>41</td><td>42</td><td>43</td><td>44</td><td>45</td><td>46</td><td>47</td><td>48</td><td>49</td><td>50</td></tr> <tr><td>51</td><td>52</td><td>53</td><td>54</td><td>55</td><td>56</td><td>57</td><td>58</td><td>59</td><td>60</td></tr> </table>	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31	32	33	34	35	36	37	38	39	40	41	42	43	44	45	46	47	48	49	50	51	52	53	54	55	56	57	58	59	60	<p>I know that ... and ... = ... so ... and ... = ...</p> <p>$30 + 20 = 50$ $34 + 20 = 54$</p>
1	2	3	4	5	6	7	8	9	10																																																						
11	12	13	14	15	16	17	18	19	20																																																						
21	22	23	24	25	26	27	28	29	30																																																						
31	32	33	34	35	36	37	38	39	40																																																						
41	42	43	44	45	46	47	48	49	50																																																						
51	52	53	54	55	56	57	58	59	60																																																						

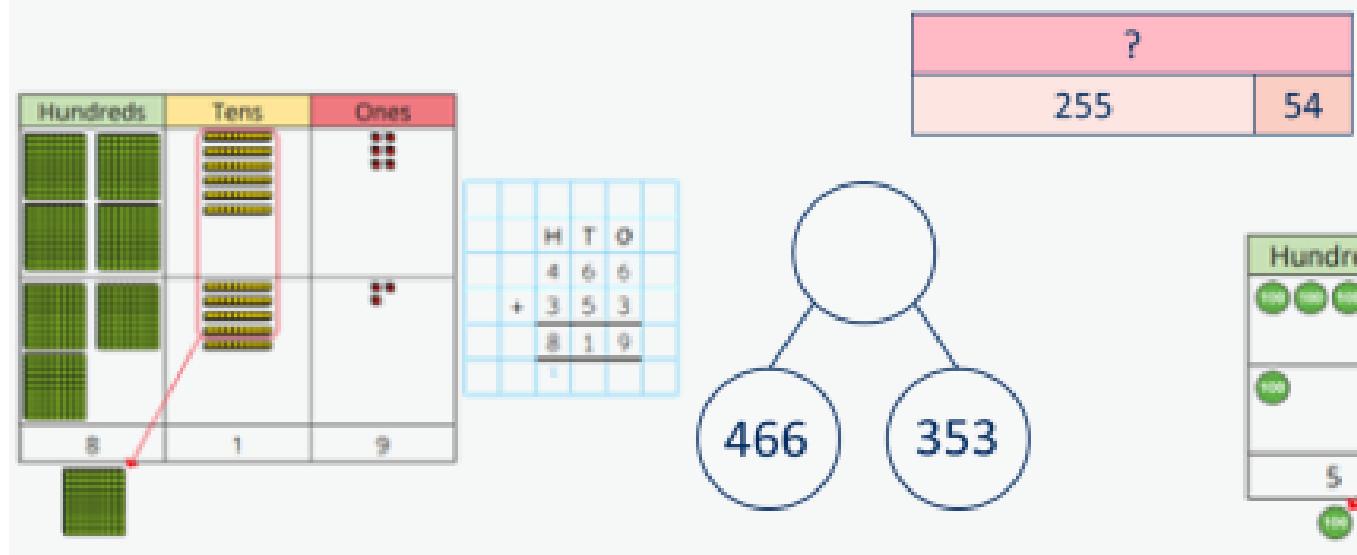

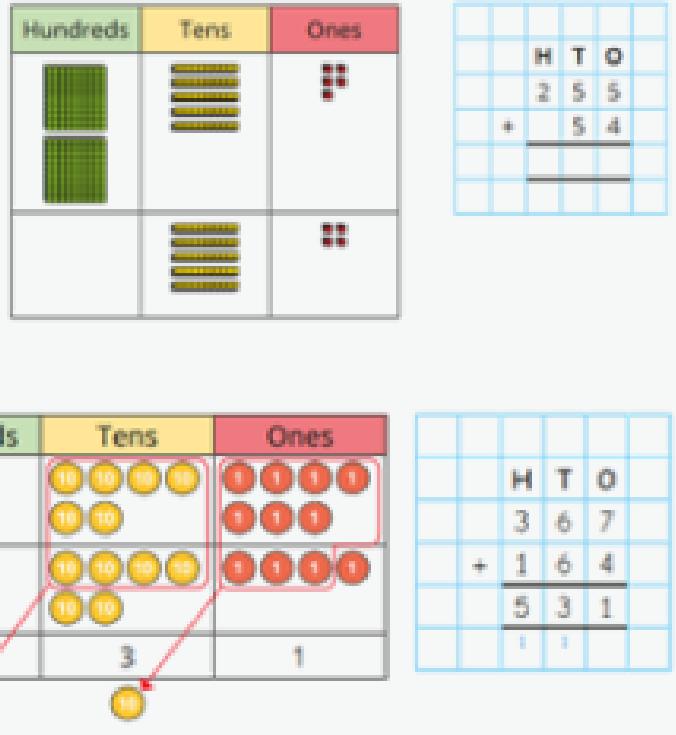

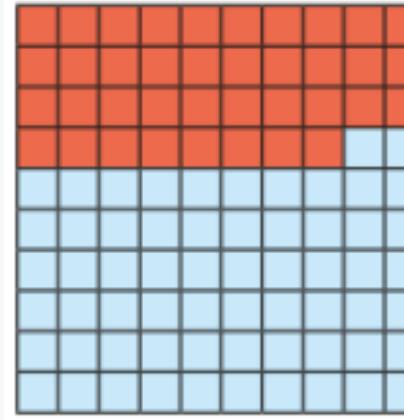

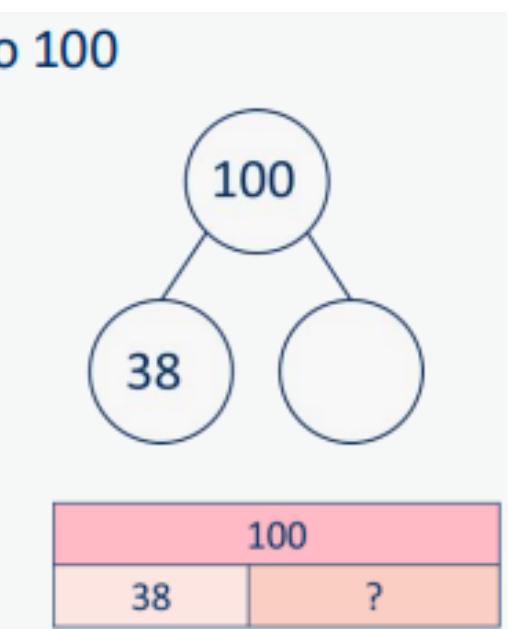

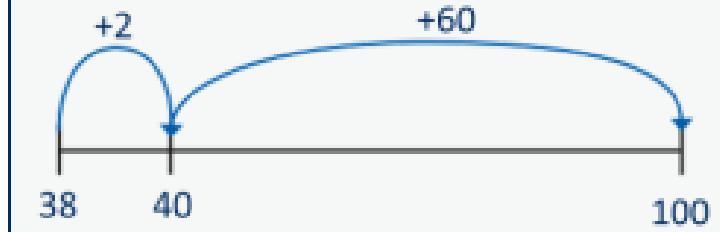

Addition

Progression of skills	Key representations
Add 2-digit numbers (not across a ten) Lining up ones and tens in columns will support with later written methods.	<p>... ones + ... ones = ... ones ... tens + ... tens = ... tens</p> <p>3 ones + 1 one = 4 ones 4 tens + 2 tens = 6 tens</p> <p>6 tens + 4 ones = 64</p> 
Add 2-digit numbers (across a ten) Begin to exchange 10 ones for 1 ten.	<p>There are ones, so I do/do not need to make an exchange.</p> <p>... ones = ... ten and ... ones</p> <p>5 ones + 7 ones = 12 ones 12 ones = 1 ten and 2 ones 4 tens + 3 tens + 1 ten = 8 tens 8 tens and 2 ones = 82</p> 
Missing numbers Solve missing number problems and use the inverse to check.	<p>How many more do you need to make ...?</p> <p>$6 + \square = 10$ $10 - \square = 6$</p> <p>If ... is a whole and ... is a part, then ... is the other part.</p> <p>$\square + 3 = 7$ $7 - 3 = \square$</p> <p>... can be partitioned into ... and ...</p> <p>$10 + 8 = 13 + \square$</p>  

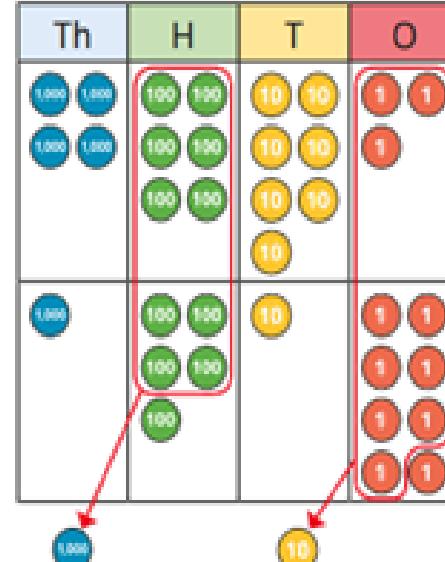

Addition

Year 3	<ul style="list-style-type: none"> • Add numbers mentally, including: a three-digit number and ones, a three-digit number and tens, a three-digit number and hundreds. • Add numbers with up to three digits, using formal written methods of columnar addition. • Add fractions with the same denominator within 1 whole. • Calculate the time taken by particular events or tasks. • Need to teach the link between base ten and coloured place value counters 																					
Progression of skills	<h2>Key representations</h2>																					
Add 1s, 10s or 100s to a 3-digit number Emphasis on mental strategies including number bonds and related facts. Prompt children to notice which digit changes.	<p>The ones/tens/hundreds column will increase by ...</p> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"> <table border="1" style="border-collapse: collapse; width: 100px; height: 100px;"> <tr><th style="background-color: #a9f5e0;">Hundreds</th><th style="background-color: #ffd700;">Tens</th><th style="background-color: #ff7f50;">Ones</th></tr> <tr><td>4</td><td>4</td><td>4</td></tr> <tr><td>4</td><td>4</td><td>4</td></tr> <tr><td>4</td><td>4</td><td>4</td></tr> </table> <p> $444 + 5 =$ $444 + 50 =$ $444 + 500 =$ </p> </div> <div style="text-align: center;"> <table border="1" style="border-collapse: collapse; width: 100px; height: 100px;"> <tr><th style="background-color: #a9f5e0;">H</th><th style="background-color: #ffd700;">T</th><th style="background-color: #ff7f50;">O</th></tr> <tr><td>100 100 100 100</td><td>10 10 10 10 10</td><td>1 1 1 1 1</td></tr> </table> <p> $777 + 2 =$ $777 + 20 =$ $777 + 200 =$ </p> </div> </div> <p>What patterns do you notice?</p> <p> $235 + 3 =$ $235 + 30 =$ $235 + 300 =$ </p> <p> $111 +$ <input style="border: 1px solid black; width: 20px; height: 20px; vertical-align: middle;"/> $= 118$ $111 +$ <input style="border: 1px solid black; width: 20px; height: 20px; vertical-align: middle;"/> $= 181$ $111 +$ <input style="border: 1px solid black; width: 20px; height: 20px; vertical-align: middle;"/> $= 811$ </p>	Hundreds	Tens	Ones	4	4	4	4	4	4	4	4	4	H	T	O	100 100 100 100	10 10 10 10 10	1 1 1 1 1

Addition

Progression of skills	Key representations
Add decimal numbers in the context of money Emphasis on partitioning and use of number lines rather than formal written calculations.	<p>... pence + ... pence = ... pence ... pounds + ... pounds = ... pounds</p>  <p>$45p + 25p = 70p$ $\pounds 2 + \pounds 3 = \pounds 5$ $\pounds 5 + 70p = \pounds 5.70$</p> <p>$\pounds 2.45 + \pounds 3.25 =$ $\pounds 3.25$ can be partitioned into $\pounds 3 + 20p + 5p$</p> 
Add fractions and mixed numbers with the same denominator beyond 1 whole	<p>When adding fractions with the same denominator, I only add the numerator.</p> <p>$\dots \text{fifths} + \dots \text{fifths} = \dots \text{fifths}$</p> <p>$\frac{3}{5} + \frac{4}{5} = \frac{7}{5} = 1\frac{2}{5}$</p>   

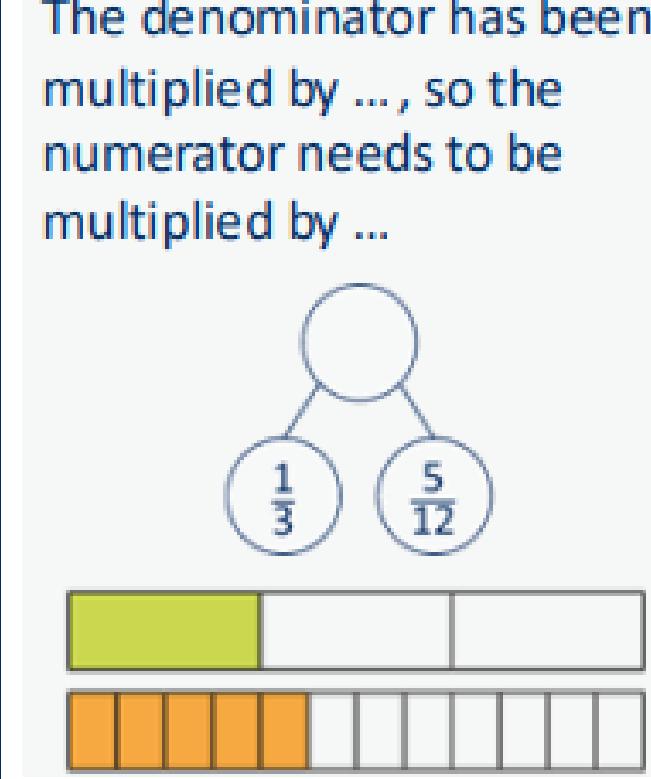

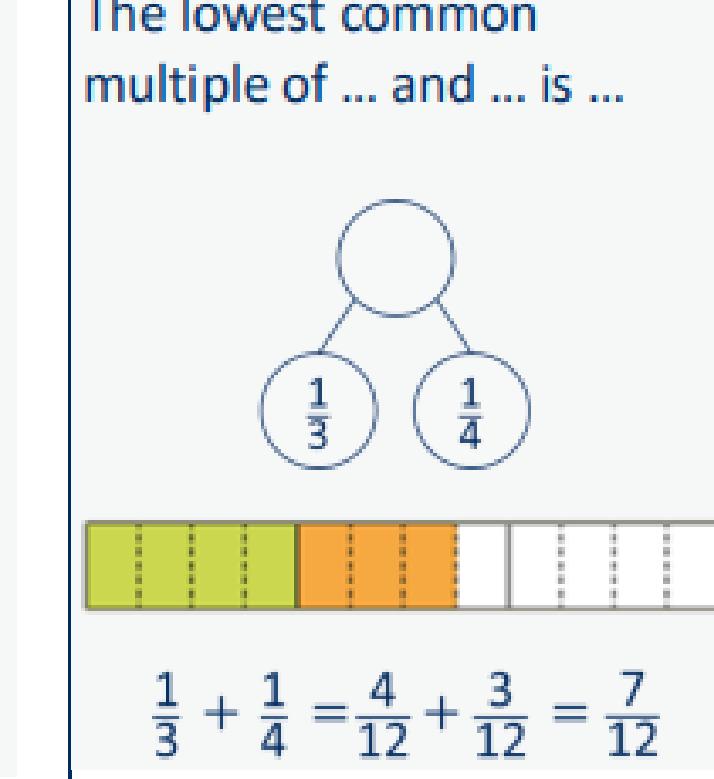

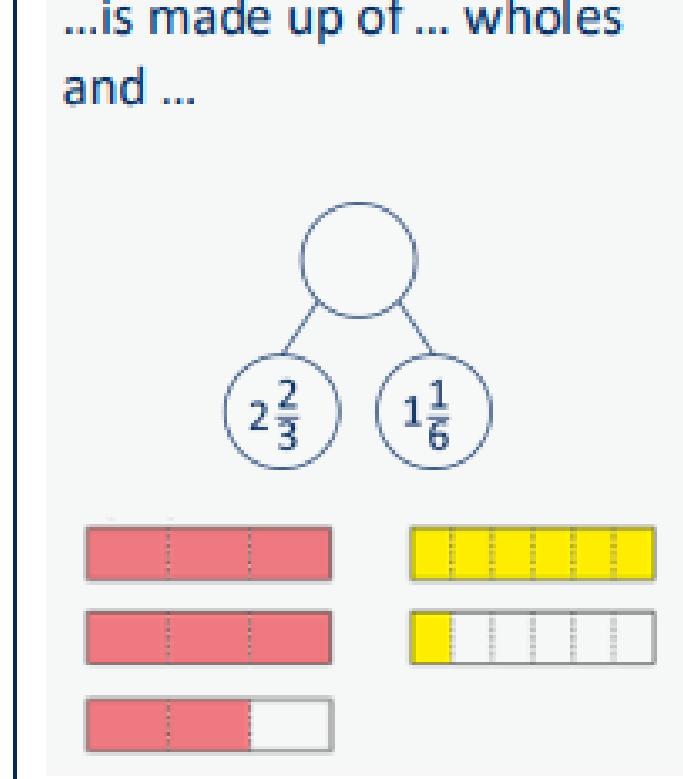

Year 5	<ul style="list-style-type: none"> • Add whole numbers with more than 4 digits, including using formal written methods. • Add numbers mentally with increasingly large numbers. • Add decimals, including a mix of whole numbers and decimals, decimals with different numbers of decimal places, and complements of 1 • Add fractions with the same denominator, and denominators that are multiples of the same number. 										
Progression of skills	<h2>Key representations</h2>										
Add using mental strategies Add 1s, 10s, 100s, etc. to any number. Use number bonds and related facts.	<div style="display: flex; justify-content: space-between;"> <div style="flex: 1;"> <table border="1" style="border-collapse: collapse; text-align: center;"> <tr> <th>TTh</th><th>Th</th><th>H</th><th>T</th><th>O</th></tr> <tr> <td>5</td><td>5</td><td>5</td><td>5</td><td></td></tr> </table> <p> $48,650 + 300 =$ $48,650 + 30,000 =$ $48,650 + 30 =$ </p> </div> <div style="flex: 1;"> <p>To add ..., I can add ... then subtract ...</p> </div> </div>	TTh	Th	H	T	O	5	5	5	5	
TTh	Th	H	T	O							
5	5	5	5								
Add whole numbers with more than 4 digits Encourage children to estimate and use inverse operations to check answers to calculations.	<div style="display: flex; justify-content: space-between;"> <div style="flex: 1;"> <p>I can exchange 10 ... for 1 ...</p> </div> <div style="flex: 1;"> </div> </div>										

Progression of skills	Key representations
<p>Add decimals with up to 2 decimal places</p> <p>Progress from the same number of decimal places to a different number of decimal places, and from no exchange to exchange.</p>	<p>I do/do not need to make an exchange because ...</p> <p>I can exchange 10 ... for 1 ...</p> <p></p> <p></p> <p></p> <p></p>
<p>Complements to 1</p> <p>Pairs of numbers with up to 3 decimal places which total 1</p> <p>Encourage children to make links with bonds to 10 and complements to 100 and 1,000.</p>	<p>$0.3 + \square = 1$ $0.35 + \square = 1$</p> <p></p> <p></p> <p></p> <p>$4 + 6 = 10$ $0.4 + 0.6 = 1$</p> <p>$44 + 56 = 100$ $0.44 + 0.56 = 1$</p> <p>$444 + 556 = 1,000$ $0.444 + 0.556 = 1$</p>

Progression of skills	Key representations
<p>Add fractions with denominators that are a multiple of one another</p> <p>Encourage children to convert fractions to the same denominator before adding.</p> <p>Progress from adding fractions within 1 whole to adding fractions beyond 1 whole.</p>	<p>The denominator has been multiplied by ..., so the numerator needs to be multiplied by...</p> <p>for the fractions to be equivalent.</p> <p>$\frac{1}{2} + \frac{1}{8} = \frac{4}{8} + \frac{1}{8} = \frac{5}{8}$</p>  <p>$\frac{1}{4} + \frac{3}{8} = \frac{2}{8} + \frac{3}{8} = \frac{5}{8}$</p>  <p>$\frac{3}{4} + \frac{5}{8} = \frac{6}{8} + \frac{5}{8} = \frac{11}{8} = 1\frac{3}{8}$</p> <p>$\frac{1}{2} + \frac{1}{8}$</p> <p>$\times 4$</p> <p>$\frac{1}{2} \quad \frac{4}{8}$</p> <p>$\times 4$</p> <p>$\frac{4}{8} + \frac{1}{8} = \frac{5}{8}$</p>

Year 6	<ul style="list-style-type: none"> • Add larger numbers, using the formal written method of columnar addition. • Use their knowledge of the order of operations to carry out calculations involving the 4 operations. • Calculate intervals across zero. • Add fractions with different denominators and mixed numbers, using the concept of equivalent fractions. 			
Progression of skills	<h3>Key representations</h3>			
Add integers up to 10 million <p>Encourage children to estimate and use inverse operations to check answers to calculations.</p>	 <p>?</p> <table border="1"> <tr> <td>2,354</td> <td>750</td> <td>1,500</td> </tr> </table> 	2,354	750	1,500
2,354	750	1,500		
Add decimals with up to 3 decimal places <p>Progress to numbers with digits in different place value columns. Encourage children to check that they have lined up the columns correctly.</p>	<p>I do/do not need to make an exchange because ...</p>   			

Progression of skills	Key representations
<p>Order of operations</p> <p>Calculations in brackets should be done first. Multiplication and division should be performed before addition and subtraction.</p> <p>*When no brackets are shown and the operations have the same priority, work left to right.</p>	<p>... has greater priority than ..., so the first part of the calculation I need to do is ...</p> <p>$(3 + 4) \times 2 = 14$</p> <p>$3 + 4 \times 2 = 11$</p> <p>$3 \times 4 + 2 = 14$</p>
	<p>... plus ... is equal to ...</p> <p>$-3 + 5 = 2$</p> <p>$-11 + 16 = 5$</p> <p>The difference between -5 and -1 is 4</p> <p>The difference between -5 and 5 is 10</p>

Progression of skills	Key representations
<p>Add fractions</p> <p>Convert fractions to the same denominator before adding. Progress from fractions where one denominator is a multiple of the other, to any fractions and then to mixed numbers.</p>	<p>The denominator has been multiplied by ..., so the numerator needs to be multiplied by ...</p>  <p>The lowest common multiple of ... and ... is ...</p>  $\frac{1}{3} + \frac{1}{4} = \frac{4}{12} + \frac{3}{12} = \frac{7}{12}$ <p>...is made up of ... wholes and ...</p> 

Progression of skills - Subtraction

Year group	Skill
Nursery	<ul style="list-style-type: none">• Subitise to 3• Count how many• Make numbers to 5• Take 1 away (through songs and rhymes)
Reception	<ul style="list-style-type: none">• Conceptually subitise to 5• 1 less• Notice the composition of numbers within 10• Partition• Take away
Year 1	<ul style="list-style-type: none">• Find a part• Take away• Bonds within 10• Related facts within 20• Missing numbers

Progression of skills - Subtraction

Year group	Skill
Year 2	<ul style="list-style-type: none">Subtract 1s from any number (related facts)Subtract across a 10Subtract multiples of 10Subtract 10s from any numberSubtract two 2-digit numbers (not across a ten)Subtract two 2-digit numbers (across a ten)Missing numbers
Year 3	<ul style="list-style-type: none">Subtract 1s, 10s and 100s from a 3-digit numberSubtract two numbers (no exchange)Subtract two numbers across a 10 or 100Complements to 100Subtract fractions with the same denominator within 1 whole

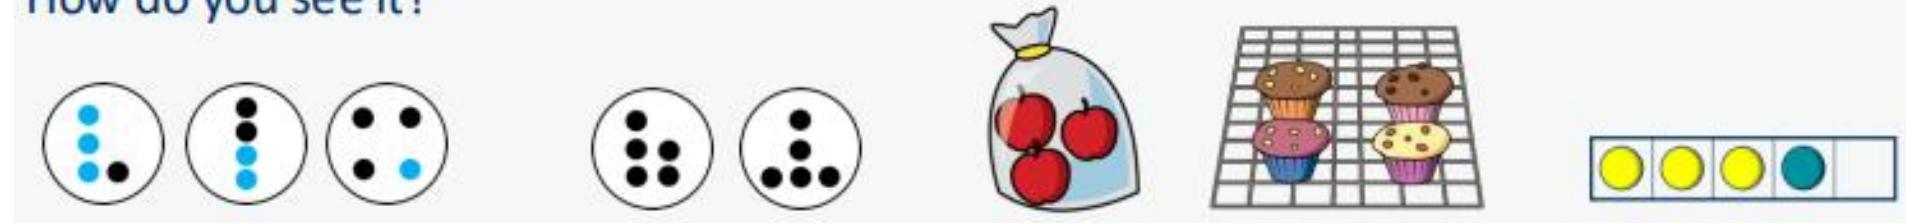

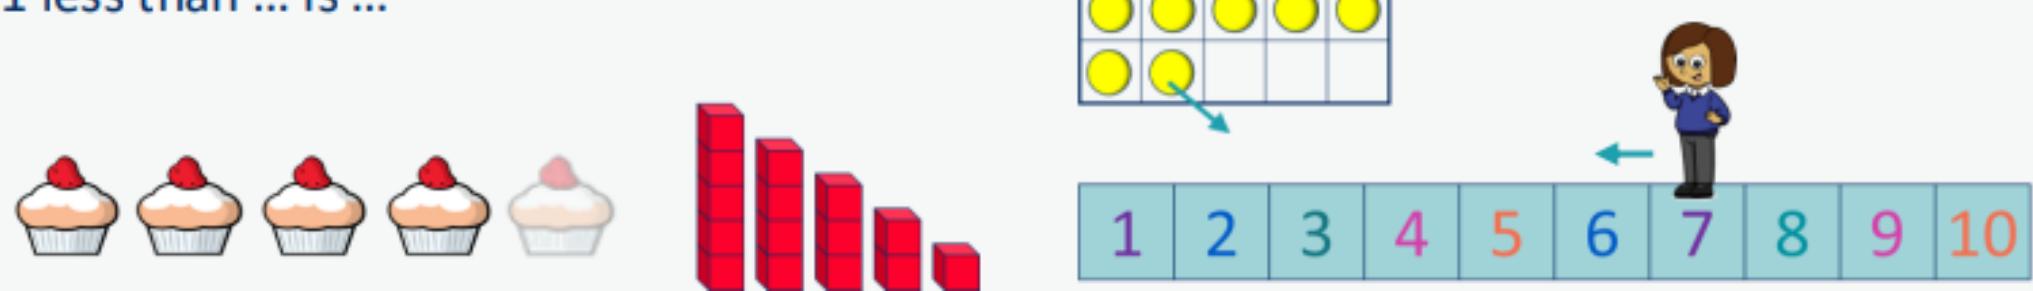

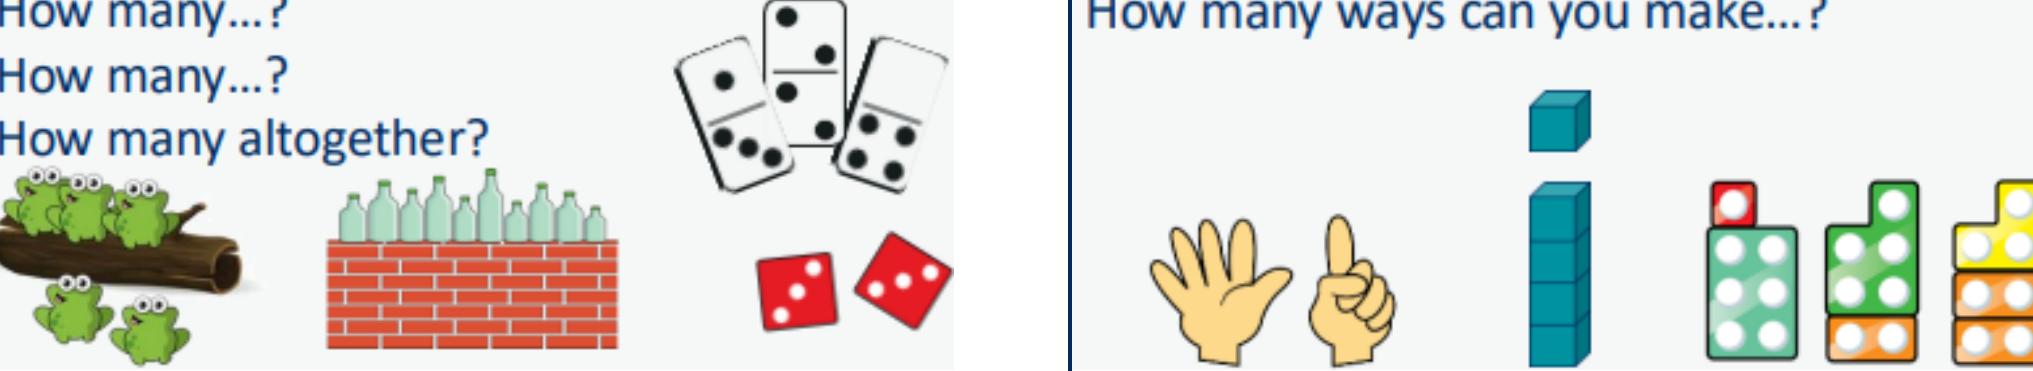

Progression of skills - Subtraction

Year group	Skill
Year 4	<ul style="list-style-type: none">Subtract 1s, 10s, 100s and 1,000s from a 4-digit numberSubtract up to two 4-digit numbersSubtract decimal numbers in the context of moneySubtract fractions and mixed numbers with the same denominator
Year 5	<ul style="list-style-type: none">Subtract whole numbers with more than 4 digitsSubtract using mental strategiesSubtract decimals with up to 2 decimal placesComplements to 1Subtract fractions with denominators that are a multiple of one another
Year 6	<ul style="list-style-type: none">Subtract integers up to 10 millionSubtract decimals with up to 3 decimal placesOrder of operationsNegative numbersSubtract fractions

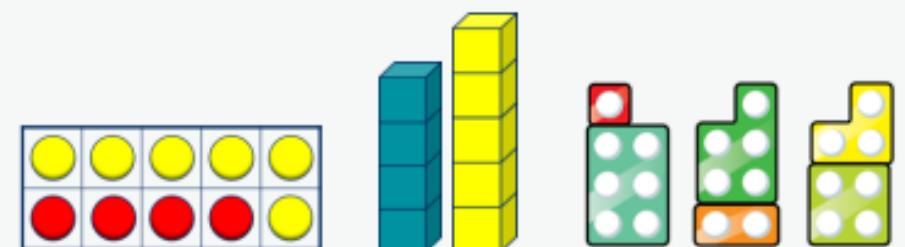

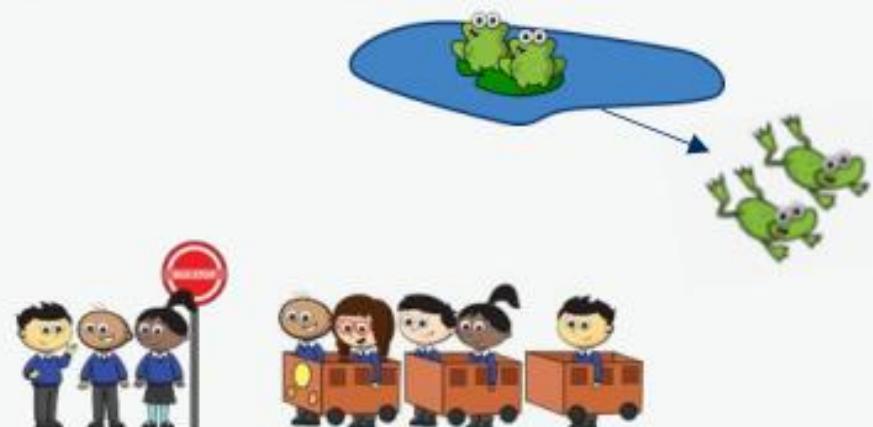

Subtraction

Nursery	<ul style="list-style-type: none"> Begin to have an understanding of numbers to 5 We recommend focusing on noticing and representing small quantities, perceptual subitising and counting.
Progression of skills	Key representations
Subitise to 3 Instantly see how many.	<p>How many do you see?</p>
Count how many Begin to count objects using 1-1 correspondence.	<p>How many are there?</p> <p>Count out ... from a larger group. E.g. Collect a cup for everyone at the table.</p>
Make numbers to 5 Start by showing 1, 2 and 3 using fingers.	<p>Show me...</p> <p>Begin to link numerals to quantities.</p>
Take 1 away Through stories, songs and rhymes.	<p>How many do we have now?</p>

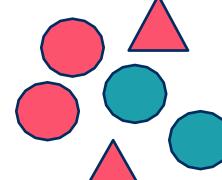

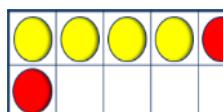

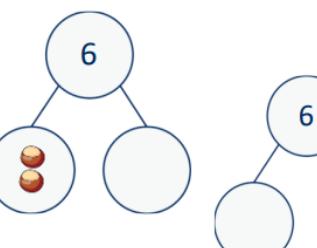

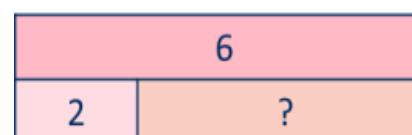

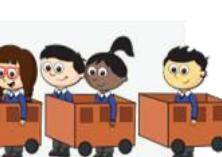

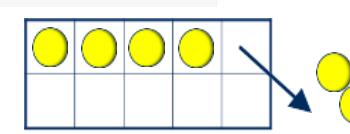

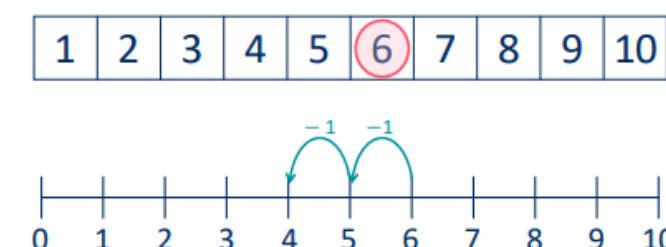

Subtraction

Reception	<ul style="list-style-type: none"> Have a deep understanding of number to 10, including the composition of each number. Subitise (recognise quantities without counting) up to 5 Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 (and some subtraction facts) and some number bonds to 10, including double facts.
Progression of skills	Key representations
Conceptually subitise to 5 Notice the parts that make up the whole.	<p>What do you see? How do you see it?</p> 
1 less Continue to link to stories, songs and rhymes.	<p>1 less than ... is ...</p> 
Notice the composition of numbers within 10 Link to stories, songs and rhymes.	<p>How many...? How many...? How many altogether?</p> 

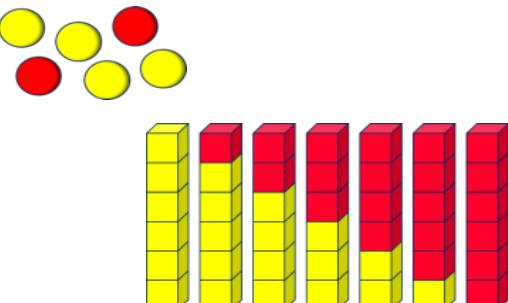

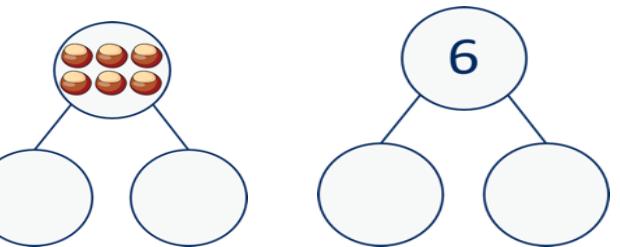

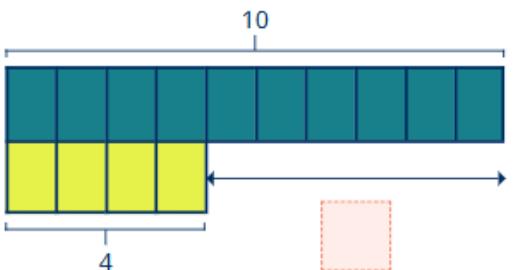

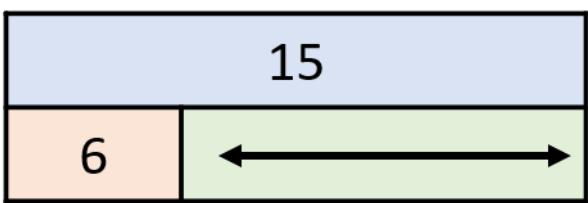

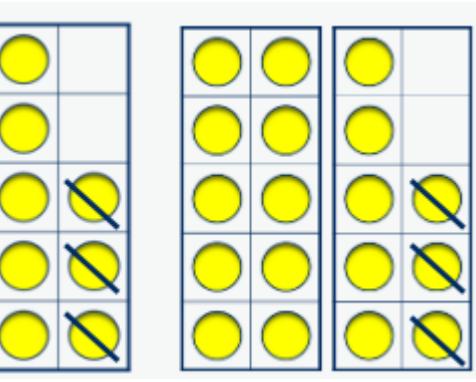

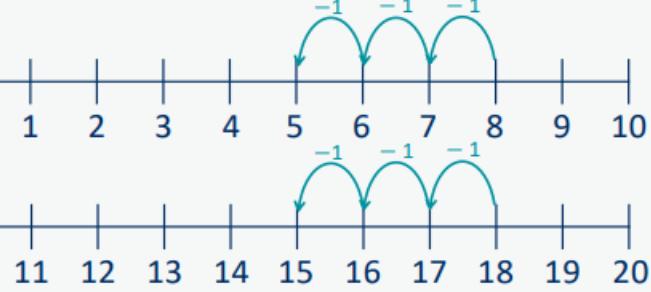

Subtraction

Progression of skills	Key representations	
<p>Partition Using objects, explore different ways to partition a number into 2 or more parts.</p>	<p>There are ... altogether. I can see ... here and ... there.</p> 	<p>... and ... make ...</p> 
<p>Take away A quantity is reduced.</p>	<p>First... Then... Now...</p> 	<p>I have ... I take ... away Now I have ...</p>  <p>1 2 3 4 5 6 7 8 9 10</p>

Subtraction

Year 1	<ul style="list-style-type: none"> Read, write and interpret mathematical statements involving subtraction ($-$) and equals ($=$) signs. Represent and use number bonds and related subtraction facts within 20 Subtract one-digit and two-digit numbers to 20, including zero. Solve one-step problems that involve subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 = \square - 9$
Progression of skills	Key representations
Find a part Link to number bonds and known facts. E.g. $2 + 4 = 6$ so if 6 is the whole and 4 is a part, the other part must be 2	<p>There are ... in total. ... are ... How many are not ...?</p>    <p>... is the whole. ... is a part. ... is a part.</p>   <p>... subtract ... is equal to is equal to ... $-$...</p> $6 - 2 = 4$ $6 - 4 = 2$ $4 = 6 - 2$ $2 = 6 - 4$
Take away A quantity is decreased.	<p>First... Then... Now...</p>    <p>I start at ... I jump back ... I land on ...</p>  <p>... minus ... is equal to is equal to ... $-$...</p> $6 - 2 = 4$ $6 - 4 = 2$ $4 = 6 - 2$ $2 = 6 - 4$

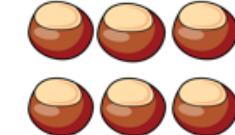

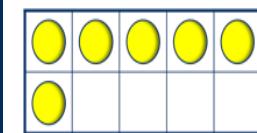

Subtraction

Progression of skills	Key representations		
<p>Bonds within 10 Focus on subtraction facts. Encourage children to notice patterns.</p>	<p>... is made of ... and and ... make ...</p> 	<p>... can be partitioned into ... and ...</p> 	<p>... minus ... is equal to ...</p> $\begin{aligned} 6 - 0 &= 6 \\ 6 - 1 &= 5 \\ 6 - 2 &= 4 \\ 6 - 3 &= 3 \\ 6 - 4 &= 2 \\ 6 - 5 &= 1 \\ 6 - 6 &= 0 \end{aligned}$
<p>Finding the difference This is the first time children will be formally learning about finding the difference as a form of subtraction.</p>	<p>Sam  Kim </p>	<p>This could be made practically using cubes.</p> 	 <p>Use this representation to support the move towards abstract.</p>
<p>Related facts within 20 Make links to known facts.</p>	<p>I know that ... minus ... = ... so ... minus ... = ...</p> 	<p>... less than ... is ... so ... less than ... is ...</p> 	<p>What patterns do you notice?</p> $\begin{aligned} 8 - 3 &= 5 \\ 18 - 3 &= 15 \\ 5 &= 8 - 3 \\ 15 &= 18 - 3 \end{aligned}$

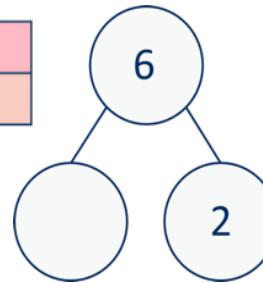

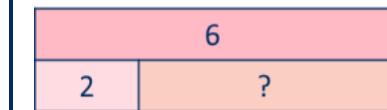

Missing numbers

Make links to known facts.

How many do you need to subtract to make ...?

If ... is the whole and ... is a part, the other part must be...

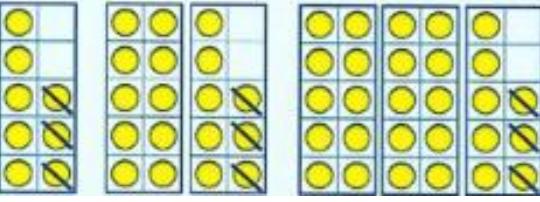

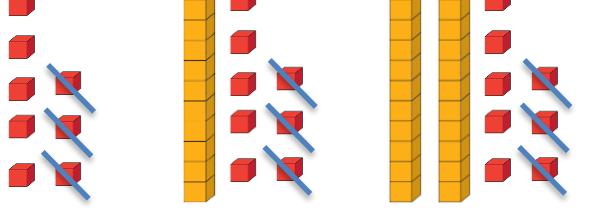

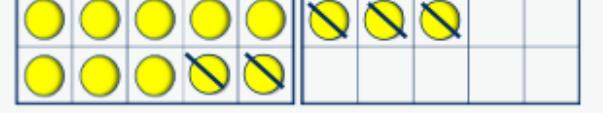

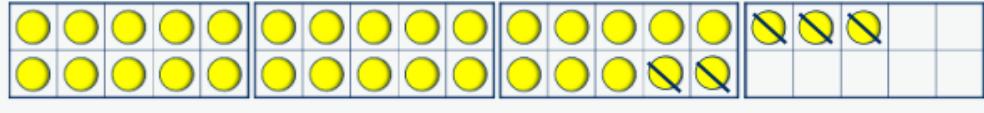

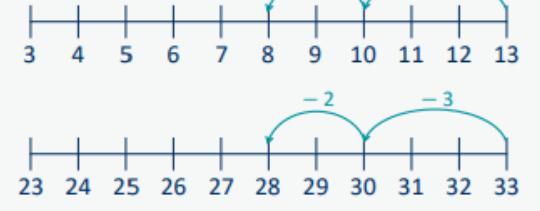

... minus ... is equal to ...

$$6 - \square = 2$$

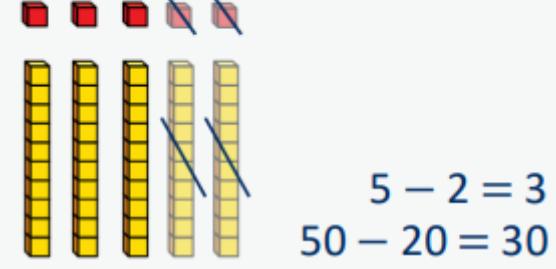

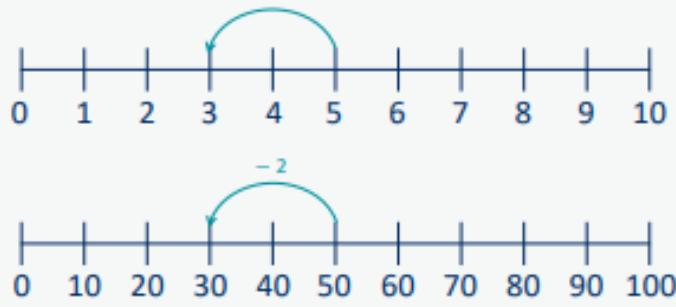

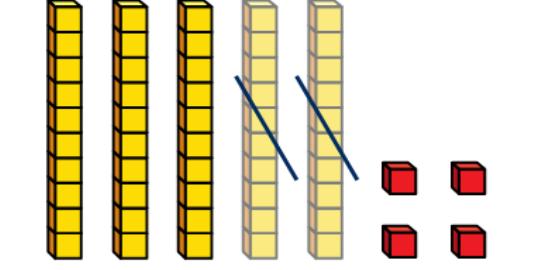

$$2 = 6 - \square$$

Subtraction

	<ul style="list-style-type: none"> Recall and use subtraction facts to 20 fluently, and derive and use related facts up to 100 Subtract numbers using concrete objects, pictorial representations, and mentally, including: <ul style="list-style-type: none"> a two-digit number and 1s a two-digit number and 10s 2 two-digit numbers Recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.
Progression of skills	<p>Key representations</p> <p>Subtract ones from any number (related facts) Make links to known facts.</p> <p>I know that ... minus ... = ... So....minus...=...</p>   <p>... less than ... is ... so ... less than ... is ...</p>   <p>What do you notice? Can you continue the pattern?</p> $8 - 3 = 5$ $18 - 3 = 15$ $28 - 3 = 25\dots$
Subtract across a 10 Partition the number being subtracted to bridge through a ten. (Please ensure that children are secure in their knowledge of subtracting from a ten ten before this step.) Take time with this step (over several days)	<p>... can be partitioned into ... and ...</p>   <p>Make links with related facts.</p>  

Subtraction

Progression of skills	Key representations																																																														
<p>Subtract multiples of 10 Make links to known facts within ten.</p>	<p>... ones – ... ones = ... ones so ... tens – ... tens = ... tens</p>  $5 - 2 = 3$ $50 - 20 = 30$	<p>What is the same? What is different?</p> 																																																													
<p>Subtract 10s from any number Make links to known facts.</p>	<p>... tens – ... tens = ... tens ... tens and ... ones = ...</p> 	<p>To subtract ... I need to subtract 10 ... times.</p> <table border="1" data-bbox="1629 1107 2232 1466"> <tbody> <tr><td>1</td><td>2</td><td>3</td><td>4</td><td>5</td><td>6</td><td>7</td><td>8</td><td>9</td><td>10</td></tr> <tr><td>11</td><td>12</td><td>13</td><td>14</td><td>15</td><td>16</td><td>17</td><td>18</td><td>19</td><td>20</td></tr> <tr><td>21</td><td>22</td><td>23</td><td>24</td><td>25</td><td>26</td><td>27</td><td>28</td><td>29</td><td>30</td></tr> <tr><td>31</td><td>32</td><td>33</td><td>34</td><td>35</td><td>36</td><td>37</td><td>38</td><td>39</td><td>40</td></tr> <tr><td>41</td><td>42</td><td>43</td><td>44</td><td>45</td><td>46</td><td>47</td><td>48</td><td>49</td><td>50</td></tr> <tr><td>51</td><td>52</td><td>53</td><td>54</td><td>55</td><td>56</td><td>57</td><td>58</td><td>59</td><td>60</td></tr> </tbody> </table>	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31	32	33	34	35	36	37	38	39	40	41	42	43	44	45	46	47	48	49	50	51	52	53	54	55	56	57	58	59	60	<p>I know that ... minus ... = ... so ... minus ... = ...</p> $50 - 20 = 30$ $54 - 20 = 34$

Subtraction

Progression of skills	Key representations
Subtract two 2-digit numbers (not across a ten)	<p>... ones – ... ones = ... ones ... tens – ... tens = ... tens</p> <p>$3 \text{ ones} - 1 \text{ one} = 2 \text{ ones}$ $4 \text{ tens} - 2 \text{ tens} = 2 \text{ tens}$ $2 \text{ tens and } 2 \text{ ones} = 22$</p>
Subtract two 2-digit numbers (across a ten) Begin to exchange 1 ten for 10 ones.	<p>I need to make an exchange because I do not have enough ones to subtract ... ones.</p> <p>$3 \text{ ones} - 5 \text{ ones}$ (I need to exchange 1 ten for 10 ones)</p> <p>$13 \text{ ones} - 5 \text{ ones} = 8 \text{ ones}$ $3 \text{ tens} - 2 \text{ tens} = 1 \text{ ten}$ $1 \text{ ten and } 8 \text{ ones} = 18$</p>
Missing numbers Solve missing number problems and use the inverse to check.	<p>How many do you need to subtract to make ...?</p> <p>$7 - 3 = \square$ $\square + 3 = 7$</p> <p>... can be partitioned into ... and ...</p> <p>$10 + 4 = 19 - \square$</p>

Subtraction

Year 3

- Subtract numbers mentally, including: a three-digit number and ones, a three-digit number and tens, a three-digit number and hundreds.
- Subtract numbers with up to three digits, using formal written methods.
- Subtract fractions with the same denominator within 1 whole.
- Need to teach the link between base 10 and coloured place value counters.**

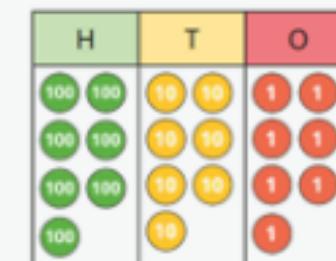

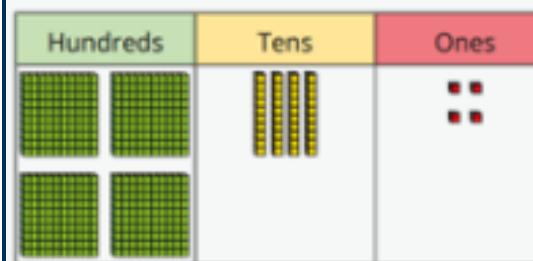

Progression of skills

Key representations

Subtract 1s, 10s and 100s from a 3-digit number

Emphasis on mental strategies including number bonds and related facts.
 Prompt children to notice which digit changes.

The ones/tens/hundreds column will decrease by .

$444 - 2 =$

$444 - 20 =$

$444 - 200 =$

$777 - 4 =$

$777 - 40 =$

$777 - 400 =$

What patterns do you notice?

$235 - 3 =$

$235 - 30 =$

$235 - 300 =$

$118 - \boxed{} = 111$

$181 - \boxed{} = 111$

$624 - 20 =$

$654 - 50 =$

$694 - 90 =$

$811 - \boxed{} = 111$

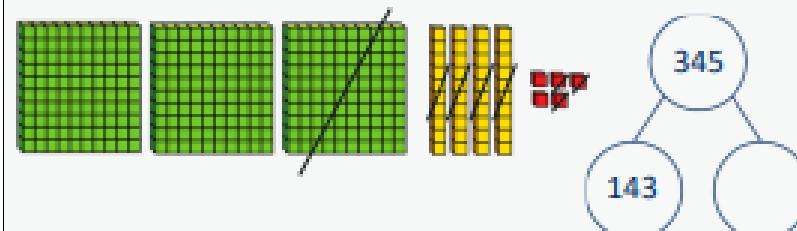

Subtract two numbers (no exchange)

Mental strategies and introduction of formal written method.

$\dots \text{ones} - \dots \text{ones} = \dots \text{ones}$

$\dots \text{tens} - \dots \text{tens} = \dots \text{tens}$

$\dots \text{hundreds} - \dots \text{hundreds} = \dots \text{hundreds}$

A red arrow points from the tens column of 38 to the tens column of 100, indicating an exchange of 10 ones for 1 ten.</p>

Progression of skills	Key representations
<p>Subtract fractions with the same denominator within 1 whole</p> <p>Make links with known facts.</p>	<p>When subtracting fractions with the same denominator, I only subtract the numerator. $\dots \text{fifths} - \dots \text{fifths} = \dots \text{fifths}$</p>  

Subtraction

Year 4

- Subtract numbers with up to 4 digits using a formal written method.
- Solve simple measure and money problems involving fractions and decimals to 2 decimal places.
- Subtract fractions with the same denominator.

Progression of skills

Subtract 1s, 10s, 100s and 1,000s from a 4-digit number

Emphasis on mental strategies including number bonds and related facts. Prompt children to notice which digit changes.

Key representations

The ones/tens/hundreds/thousands column will decrease by ...

Thousands	Hundreds	Tens	Ones
1,000 1,000 1,000	100 100 100 100	10 10 10 10	1 1 1 1 1

$$3,425 - 2 = \quad 3,425 - 200 =$$

$$3,425 - 20 = \quad 3,425 - 2,000 =$$

What patterns do you notice?

$$4,356 - 3 =$$

$$4,356 - 30 =$$

$$4,356 - 300 =$$

$$4,356 - 3,000 =$$

$$4,433 - \boxed{\quad} = 4,430$$

$$4,433 - \boxed{\quad} = 4,033$$

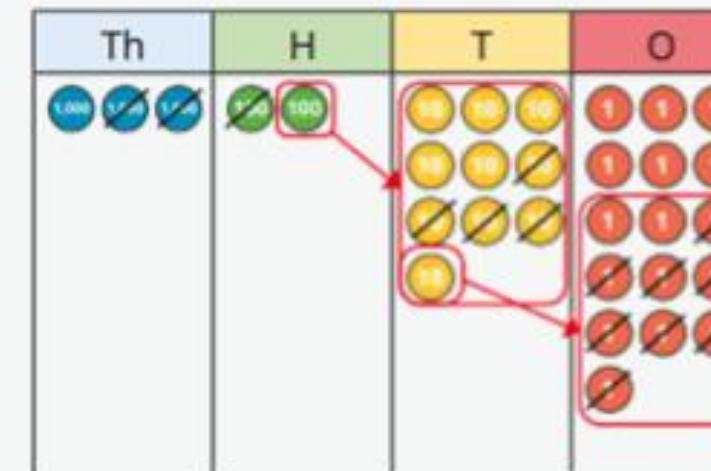

$$4,433 - \boxed{\quad} = 4,403$$

Subtract up to two 4-digit numbers

Formal written method with up to 3 exchanges. Encourage children to estimate and use inverse operations to check answers to calculations.

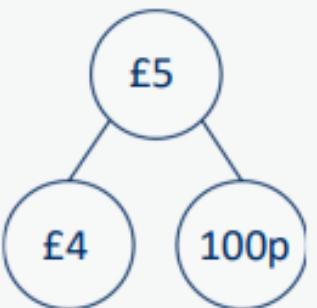

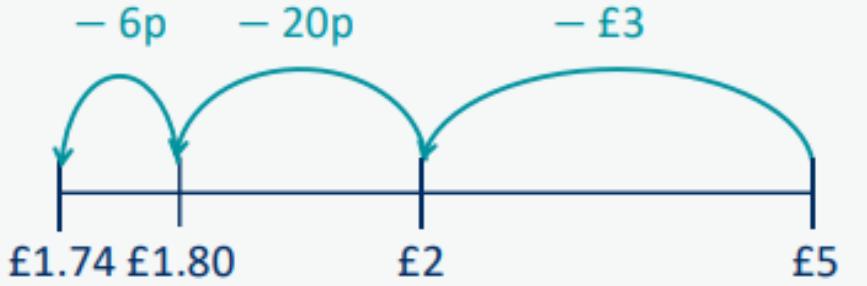

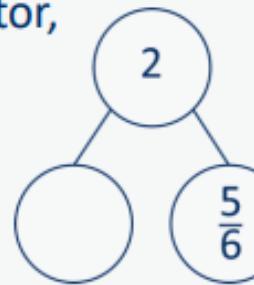

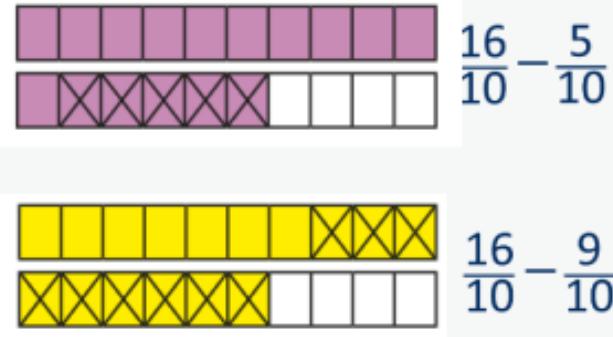

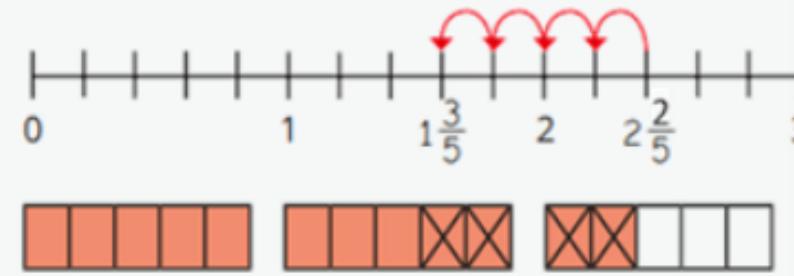

I need to subtract... ones/tens/hundreds. I do/do not need to make an exchange.

I can exchange 1... for 10...

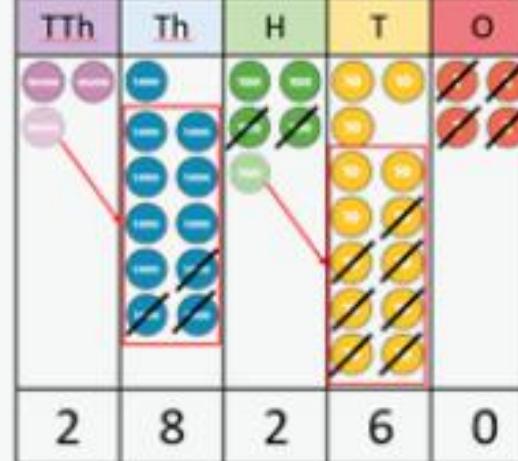

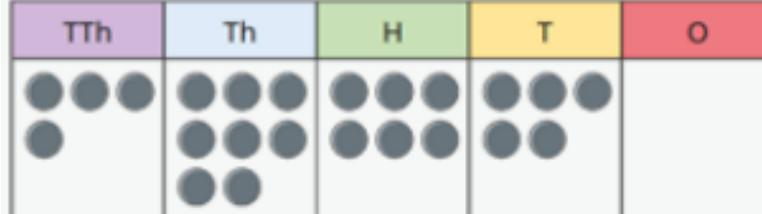

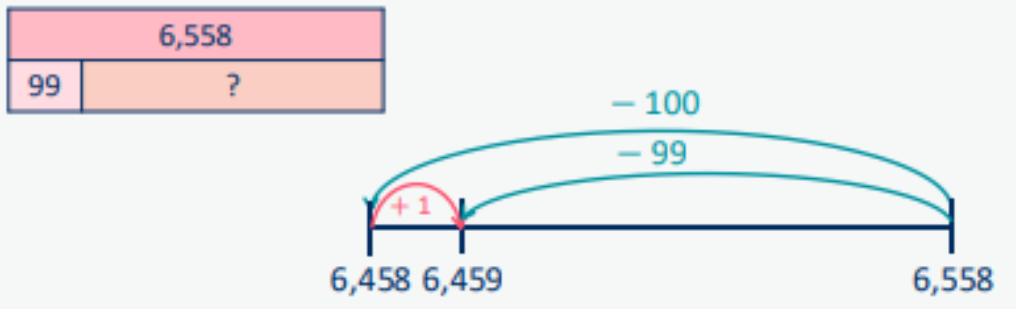

Th	H	T	O
3	2	7	6
-	2	1	4
1	0	5	8

Subtraction

Progression of skills	Key representations
Subtract decimal numbers in the context of money Emphasis here is on partitioning and use of number lines rather than formal written conversations.	<p>I can partition £... into £... and 100p $\text{£}... - \text{£}... = \text{£}...$ $100\text{p} - ... \text{p} = ... \text{p}$</p> <p>$\text{£}5 - \text{£}3.26$ $\text{£}4 - \text{£}3 = \text{£}1$ $100\text{p} - 26\text{p} = 74\text{p}$ $\text{£}5 - \text{£}3.26 = \text{£}1.74$</p>  
Subtract fractions and mixed numbers with the same denominator Include subtracting fractions from wholes.	<p>When subtracting fractions with the same denominator, I only subtract the numerator. $... \text{tenths} - ... \text{tenths} = ... \text{tenths}$</p>   

Subtraction

Year 5	<ul style="list-style-type: none"> Subtract whole numbers with more than 4 digits. Subtract numbers mentally with increasingly large numbers. Subtract decimals, including a mix of whole numbers and decimals, decimals with different numbers of decimal places, and complements of 1 Subtract fractions with the same denominator, and denominators that are multiples of the same number. 																																	
Progression of skills	Key representations																																	
Subtract whole numbers with more than 4 digits Encourage children to estimate and use inverse operations to check answers to calculations.	<p>I can exchange 1 ... for 10 ...</p>  <table border="1" data-bbox="1962 983 2289 1215"> <tr> <td>2</td><td>3</td><td>1</td><td>4</td><td>5</td><td>1</td><td>3</td><td>4</td> </tr> <tr> <td>-</td><td>3</td><td>2</td><td>7</td><td>4</td><td></td><td></td><td></td> </tr> <tr> <td>2</td><td>8</td><td>2</td><td>6</td><td>0</td><td></td><td></td><td></td> </tr> </table> <table border="1" data-bbox="2343 961 2798 1237"> <tr> <td>5</td><td>4</td><td>8</td> </tr> <tr> <td>-</td><td>1</td><td>2</td> </tr> <tr> <td>2</td><td>0</td><td>8</td> </tr> </table>	2	3	1	4	5	1	3	4	-	3	2	7	4				2	8	2	6	0				5	4	8	-	1	2	2	0	8

Use number bonds and related facts.	 <p> $48,650 - 300 =$ $48,650 - 30,000 =$ $48,650 - 30 =$ </p> <p>To subtract ..., I can subtract ... then add ...</p>  <table border="1" data-bbox="1931 1612 2289 1724"> <tr> <td>99</td> <td>?</td> </tr> </table>	99	?																															
99	?																																	

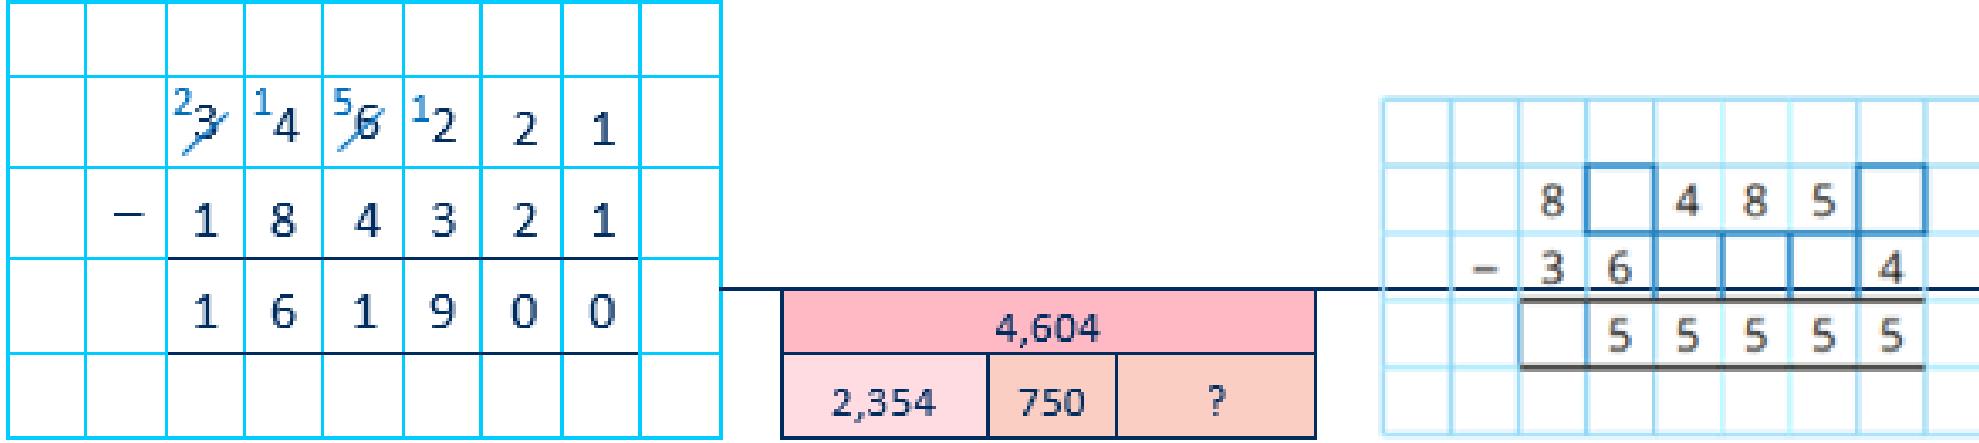

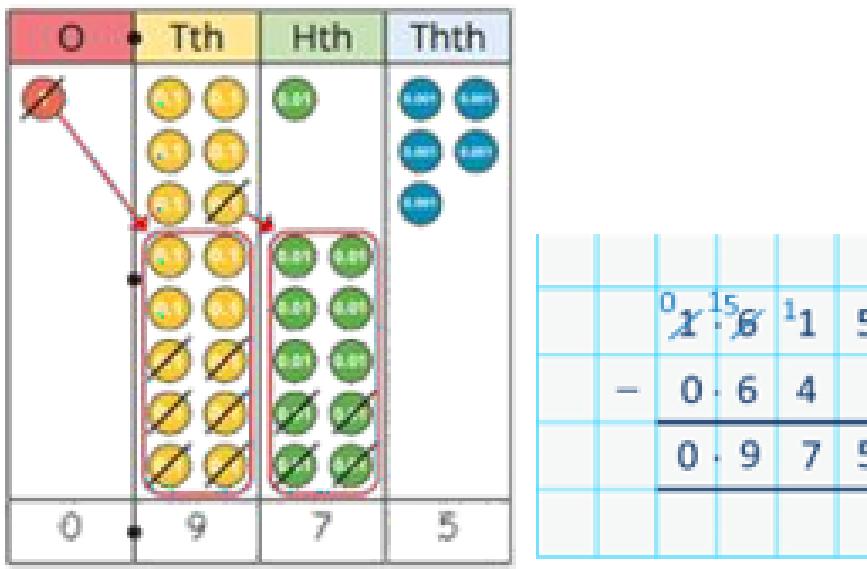

Subtraction

Progression of skills	Key representations
Subtract decimals with up to 2 decimal places Progress from the same number of decimal places to a different number of decimal places and from no exchange to exchange.	
Complements to 1 Encourage children to make links with bonds to 10 and complements to 100 and 1,000 when finding a missing part or subtracting from 1	$0.3 + \square = 1$ $0.35 + \square = 1$ $1 = 0.4 + ?$ $1 = 0.44 + ?$ $1 = 0.444 + ?$ $10 - 4 = 6$ $100 - 44 = 56$ $1,000 - 444 = 556$ $1 - 0.4 = 0.6$ $1 - 0.44 = 0.56$ $1 - 0.444 = 0.556$

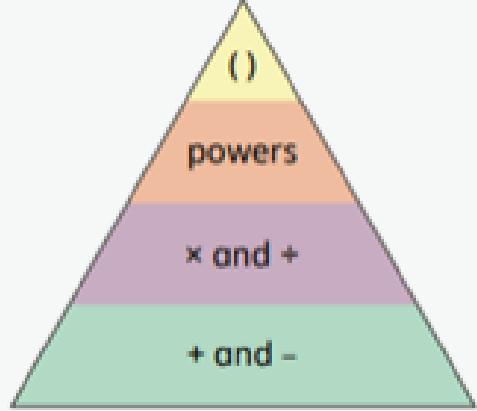

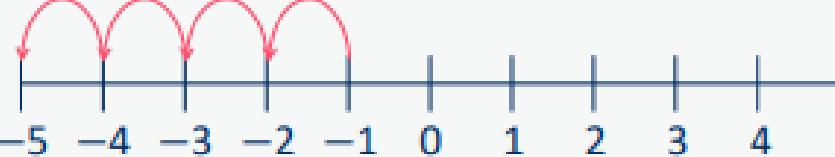

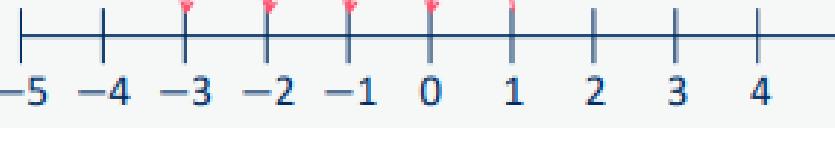

Subtraction

Progression of skills	Key representations
<p>Subtract fractions with denominators that are a multiple of one another</p> <p>Convert fractions to the same denominator before subtracting. Progress from subtracting fractions within 1 whole to subtracting from a mixed number.</p>	<p>The denominator has been multiplied by ... , so the numerator needs to be multiplied by...</p> <p>for the fractions to be equivalent.</p> $\frac{1}{3} - \frac{1}{15} = \frac{5}{15} - \frac{1}{15} = \frac{4}{15}$ $\frac{1}{9} \quad \frac{2}{9} \quad \frac{3}{9} \quad \frac{4}{9} \quad \frac{5}{9} \quad \frac{6}{9} \quad \frac{7}{9} \quad \frac{8}{9} \quad \frac{9}{9}$ $\frac{2}{3} - \frac{2}{9} = \frac{6}{9} - \frac{2}{9} = \frac{4}{9}$
<p>Negative numbers</p> <p>Children to find the difference between positive and negative numbers across zero</p>	<p>$1 - 4 = -3$</p> <p>$1 - 4 = -3$</p> <p>$-5 \quad -4 \quad -3 \quad -2 \quad -1 \quad 0 \quad 1 \quad 2 \quad 3 \quad 4 \quad 5$</p> <p>$-5 \quad -5$</p> <p>The difference between 5 and -5 is 10</p>

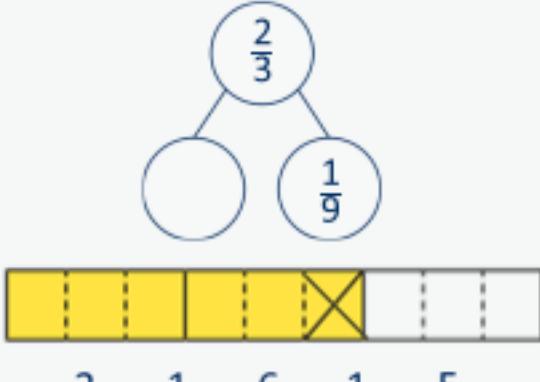

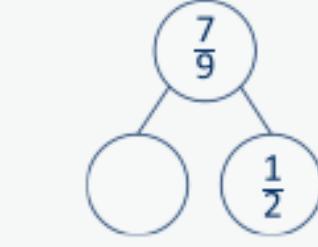

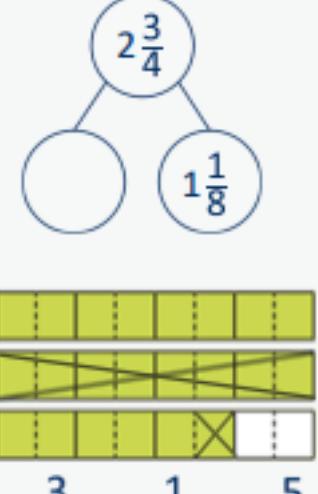

Subtraction

Year 6	<ul style="list-style-type: none"> Subtract larger numbers, using the formal written methods of columnar subtraction. Use their knowledge of the order of operations to carry out calculations involving the 4 operations. Calculate intervals across zero. Subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions.
Progression of skills	Key representations
Subtract integers up to 10 million Encourage children to estimate and use inverse operations to check answers to calculations.	 <p>2,354 - 1,843 = 1,611</p> <p>8,485 - 3,654 = 5,555</p> <p>4,604</p> <p>2,354 750 ?</p>
Subtract decimals with up to 3 decimal places Progress from the same number of decimal and whole number places to a different number of decimal and whole number places.	<p>I do/do not need to make an exchange because ...</p>  <p>0.975 - 0.64 = 0.335</p>

Subtraction

Progression of skills	Key representations
<p>Order of operations</p> <p>Children learn the order of priority for operations in a calculation. Calculations in brackets should be done first. Multiplication and division should be performed before addition and subtraction.</p>	<p>... has greater priority than ..., so the first part of the calculation I need to do is ...</p>  <p>$8 - 2 \times 3 = 2$</p> <p>$8 - 2^2 = 4$</p> <p>$(8 - 2) \times 3 = 18$</p>
<p>Negative numbers</p> <p>Children subtract from positive and negative numbers and calculate intervals across 0</p>	<p>... minus ... is equal to ...</p> <p>$-1 - 4 = -5$</p>  <p>$1 - 4 = -3$</p>  <p>The difference between -5 and -1 is 4</p> <p>The difference between 5 and -5 is 10</p>

Subtraction

Progression of skills	Key representations		
Subtract fractions Convert fractions to the same denominator before subtracting. Progress from fractions where one denominator is a multiple of the other, to any fractions and then subtracting from a mixed number.	<p>The denominator has been multiplied by ..., so the numerator needs to be multiplied by...</p>  $\frac{2}{3} - \frac{1}{9} = \frac{6}{9} - \frac{1}{9} = \frac{5}{9}$	<p>The lowest common multiple of ... and ... is ...</p>  $\frac{7}{9} - \frac{1}{2} = \frac{14}{18} - \frac{9}{18} = \frac{5}{18}$	<p>... is made up of ... wholes and ...</p>  $2\frac{3}{4} - 1\frac{1}{8} = \frac{16}{8} - \frac{9}{8} = \frac{7}{8}$

Progression of skills - Multiplication

Year group	Skill
Nursery	<ul style="list-style-type: none">Continue with counting and subitising skills as a foundation for later work on equal groups. (see addition and subtraction sections)
Reception	<ul style="list-style-type: none">Double to 10Make equal groups
Year 1	<ul style="list-style-type: none">Count in 2s, 5s and 10sAdd equal groupsMake arraysMake doubles

Progression of skills - Multiplication

Year group	Skill
Year 2	<ul style="list-style-type: none">• Link repeated addition and multiplication• Use arrays• Double• The 2 times-table• The 10 times-table• The 5 times-table• Missing numbers
Year 3	<ul style="list-style-type: none">• The 3 times-table• The 4 times-table• The 8 times-table• Related facts• Multiply a 2-digit number by a 1-digit number - no exchange• Multiply a 2-digit number by a 1-digit number - with exchange• Scaling• Correspondence problems

Progression of skills - Multiplication

Year group	Skill
Year 4	<ul style="list-style-type: none">• Times-table facts to 12×12• Multiply by 1 and 0• Multiply 3 numbers• Factor pairs• Multiply by 10 and 100• Related facts• Mental strategies• Multiply a 2 or 3-digit number by a 1-digit number• Scaling• Correspondence problems

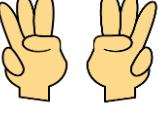

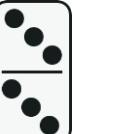

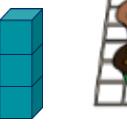

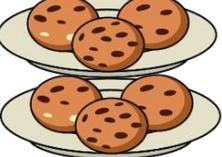

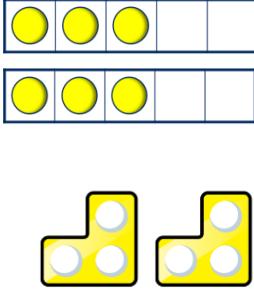

Progression of skills - Multiplication

Year group	Skill
Year 5	<ul style="list-style-type: none">• Multiples and factors• Square and cube numbers• Multiply numbers up to 4 digits by a 1-digit number• Multiply numbers up to 4 digits by a 2-digit number• Multiply by 10, 100 and 1,000• Mental strategies• Multiply fractions by a whole number• Multiply mixed numbers by a whole number• Find the whole

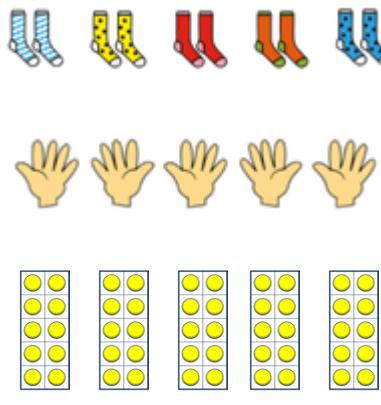

Progression of skills - Multiplication

Year group	Skill
Year 6	<ul style="list-style-type: none">• Multiply numbers up to 4 digits by a 2-digit number• Multiply by 10, 100 and 1,000• Order of operations• Multiply decimals by integers• Multiply fractions by fractions• Find the whole• Calculations involving ratio

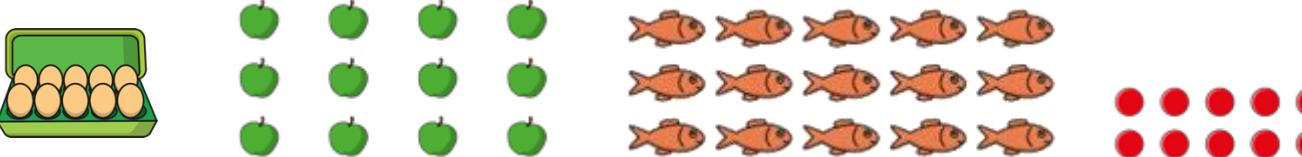

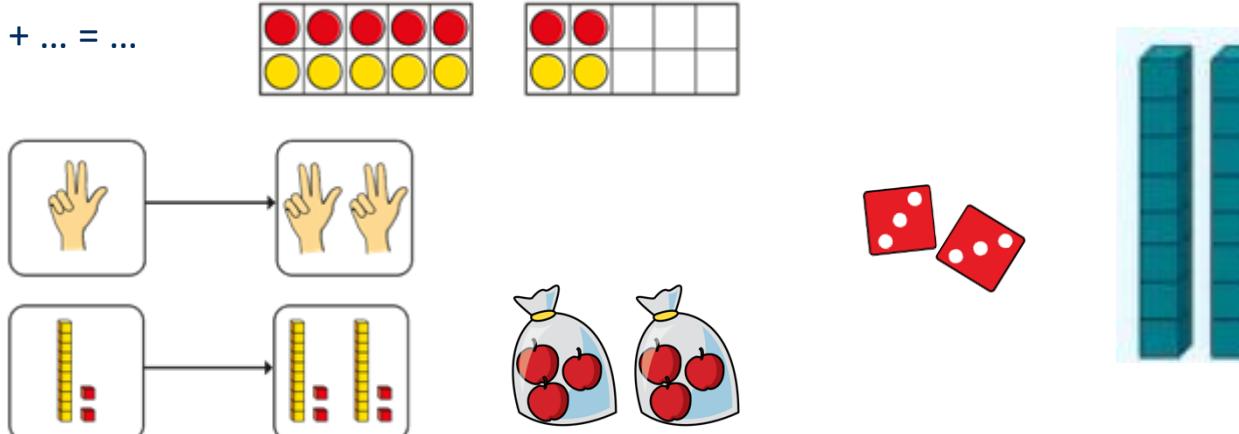

Multiplication

Reception	<ul style="list-style-type: none"> Have a deep understanding of number to 10, including the composition of each number. Subitise (recognise quantities without counting) up to 5 Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 and some number bonds to 10, including double facts. Explore and represent patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed equally.
Progression of skills	Key representations
Double to 10 Prompt children to notice that double means twice as many and to notice that there are two equal groups.	Double ... is is double ...        
Make equal groups Provide opportunities to make equal groups when tidying up or during snack time. Encourage children to check that each group has the same amount.	There are ... groups of ... There are ... altogether.     

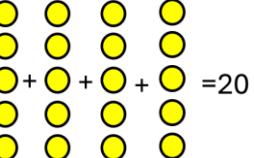

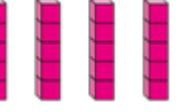

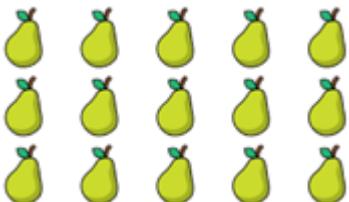

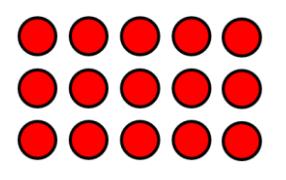

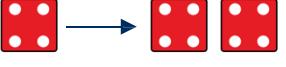

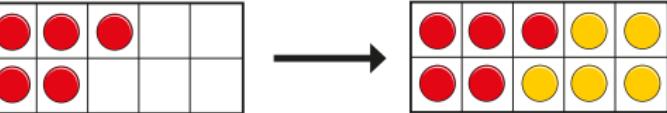

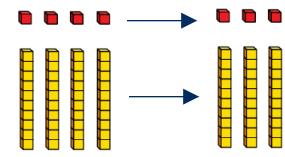

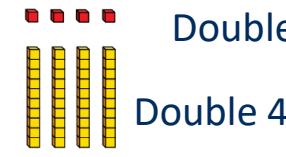

Multiplication

Year 1	<ul style="list-style-type: none"> Count in multiples of twos, fives and tens. Solve one-step problems involving multiplication, using concrete objects, pictorial representations and arrays with the support of the teacher. 																																																		
Progression of skills	Key representations																																																		
Count in 2s, 5s and 10s Begin by counting objects that naturally come in 2s, 5s and 10s, for example pairs of socks or fingers.	<p>There are ... equal groups of ... There are ... altogether.</p>  <p>Continue to colour in ...s What do you notice?</p> <table border="1" data-bbox="1603 932 2175 1268"> <tr><td>1</td><td>2</td><td>3</td><td>4</td><td>5</td><td>6</td><td>7</td><td>8</td><td>9</td><td>10</td></tr> <tr><td>11</td><td>12</td><td>13</td><td>14</td><td>15</td><td>16</td><td>17</td><td>18</td><td>19</td><td>20</td></tr> <tr><td>21</td><td>22</td><td>23</td><td>24</td><td>25</td><td>26</td><td>27</td><td>28</td><td>29</td><td>30</td></tr> <tr><td>31</td><td>32</td><td>33</td><td>34</td><td>35</td><td>36</td><td>37</td><td>38</td><td>39</td><td>40</td></tr> <tr><td>41</td><td>42</td><td>43</td><td>44</td><td>45</td><td>46</td><td>47</td><td>48</td><td>49</td><td>50</td></tr> </table> <p>Complete the number track/number line by counting in ...s.</p> <p>5 10 15 20 _____</p> <p>0 10 20 30 40</p>	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31	32	33	34	35	36	37	38	39	40	41	42	43	44	45	46	47	48	49	50
1	2	3	4	5	6	7	8	9	10																																										
11	12	13	14	15	16	17	18	19	20																																										
21	22	23	24	25	26	27	28	29	30																																										
31	32	33	34	35	36	37	38	39	40																																										
41	42	43	44	45	46	47	48	49	50																																										
Add equal groups (repeated addition) Children should be able to write a repeated addition to represent equal groups and to draw pictures or use objects to represent a repeated addition.	<p>There are ... groups of ... There are ... altogether.</p>  <p>$10 + 10 + 10 = 30$</p>  <p>$5 + 5 + 5 + 5 = 20$</p> <p>Children need to physically make equal groups with objects (practically)</p> <p>What is the same? What is different?</p> <p>$2 + 2 + 2 =$ $5 + 5 + 5 =$ $10 + 10 + 10 =$</p> <p>Use objects or a drawing to represent the equal groups and find how many in total.</p>																																																		

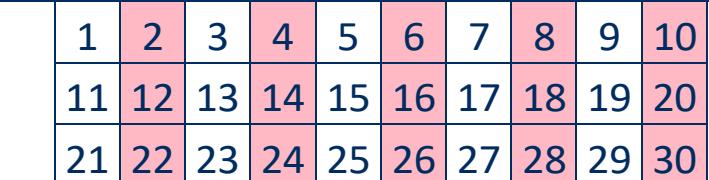

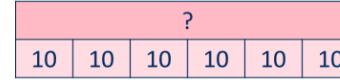

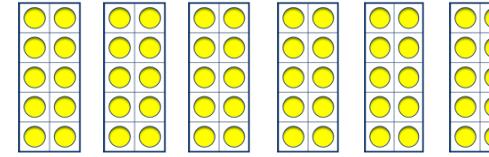

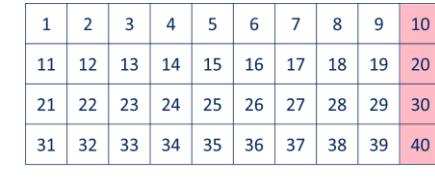

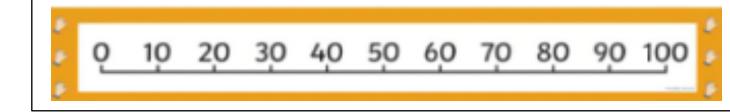

Multiplication

Progression of skills	Key representations
<p>Make arrays</p> <p>Children use their knowledge of adding equal groups to arrange objects in columns and rows.</p>	<p>There are ... rows of ... There are ... altogether. There are ... columns of ... There are ... altogether. Before pictorially, use concrete resources to practically make arrays.</p> 
<p>Make doubles</p> <p>Children understand that doubles are two equal groups. Children may begin to explore doubles beyond 20 using base 10</p>	<p>Ensure children practically make the number first then double the number</p> <p>Double ... is ... $\dots + \dots = \dots$</p> 

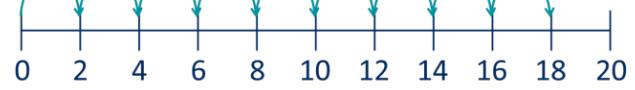

Multiplication

Year 2	<ul style="list-style-type: none"> Recall and use multiplication facts for the 2, 5 and 10 multiplication tables. Calculate mathematical statements for multiplication within the multiplication tables and write them using the multiplication (\times) and equals ($=$) signs. Show that multiplication of two numbers can be done in any order (commutative). 												
Progression of skills	Key representations												
Link repeated addition and multiplication Encourage children to make the link between repeated addition and multiplication. This will be the first time they will see the multiplication symbol (\times)	<p>There are ... equal groups with ... in each group. There are ... altogether.</p>  <table border="1" data-bbox="2175 617 2524 729"> <tr> <td colspan="2" style="text-align: center;">6</td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: center;">3</td> </tr> </table> $3 + 3 = 6$ $2 \times 3 = 6$   <table border="1" data-bbox="2016 819 2524 977"> <tr> <td colspan="4" style="text-align: center;">20</td> </tr> <tr> <td style="text-align: center;">5</td> <td style="text-align: center;">5</td> <td style="text-align: center;">5</td> <td style="text-align: center;">5</td> </tr> </table> $5 + 5 + 5 + 5 = 20$ $4 \times 5 = 20$	6		3	3	20				5	5	5	5
6													
3	3												
20													
5	5	5	5										
Use arrays Encourage children to see that multiplication is commutative.	<p>There are ... rows with ... in each row. There are ... columns with ... in each column.</p>  $3 \text{ lots of } 5 = 15$ $5 + 5 + 5 = 15$ $5 \text{ lots of } 3 = 15$ $3 + 3 + 3 + 3 + 3 = 15$  <p>I can see ... \times ... and ... \times ...</p> $3 \times 5 = 15$ $5 \times 3 = 15$ $3 \times 5 = 5 \times 3$												
Double Encourage children to make links with related facts.	<p>Double ... is ... Double $4 = 4 + 4$ Double 4 is 8</p>  <p>Double $5 = 5 + 5$ Double 5 is 10</p>  <p>Double ... is ... so double ... is ...</p>   $\text{Double } 4 \text{ is } 8$ $\text{Double } 40 \text{ is } 80$												

Multiplication

Progression of skills	Key representations
<p>The 2 times-table</p> <p>Encourage daily counting in multiples both forwards and back. Notice that all multiples of 2 are even numbers.</p> <p>Teach</p>	<p>... lots of 2 =</p> <p>... $\times 2$ =</p> <p>Encourage daily counting in multiples both forwards and back. Notice that all multiples of 2 are even numbers.</p> <p>Teach</p> <p></p> <p></p> <p></p> <p></p> <p>$1 \times 2 = 2$ $2 = 1 \times 2$ $2 \times 2 = 4$ $4 = 2 \times 2$ $3 \times 2 = 6$ $6 = 3 \times 2$</p> <p></p>

Progression of skills	Key representations
<p>Multiply 3 numbers</p> <p>Children use their understanding of commutativity to multiply more efficiently.</p>	<p>To work out $\dots \times \dots \times \dots$, I can first calculate $\dots \times \dots$ and then multiply the answer by ...</p>  $4 \times 2 \times 3 = 8 \times 3 = 24$ $2 \times 3 \times 4 = 6 \times 4 = 24$ $3 \times 4 \times 2 = 12 \times 2 = 24$
<p>Factor pairs</p> <p>Children explore equivalent calculations using different factors pairs.</p>	$12 = \dots \times \dots, \text{ so } \dots \times 12 = \dots \times \dots \times \dots$  $8 \times 6 = 8 \times 3 \times 2$ $8 \times 6 = 24 \times 2$  $6 \times 8 = 6 \times 4 \times 2$ $6 \times 8 = 24 \times 2$

Multiply by 10 and 100

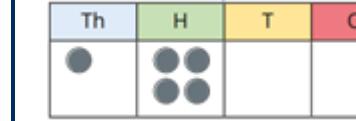

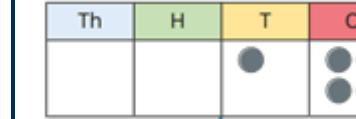

Some children may over- generalise that multiplying by 10 or 100 always results in adding zeros. This will cause issues later when multiplying decimals.

When I multiply by 10, the digits move ... place value column to the left.
... is 10 times the size of ...

$$35 \times 10 = 350$$

When I multiply by 100, the digits move ... place value columns to the left.
... is 100 times the size of ...

$$14 \times 100 = 1,400$$

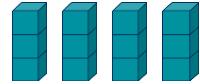

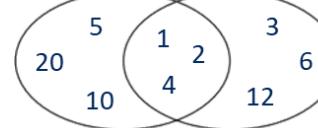

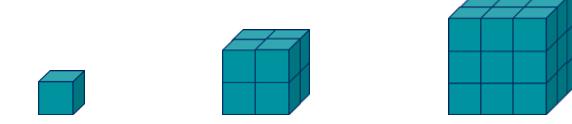

Multiplication

Progression of skills	Key representations
Related facts Use knowledge of multiplying by 10 and 100 to scale times-table facts.	<p>... × ... ones is equal to ... ones so ... × ... tens is equal to ... tens and ... × ... hundreds is equal to ... hundreds.</p> $3 \times 7 = 21 \quad 7 \times 3 = 21$ $3 \times 70 = 210 \quad 7 \times 30 = 210$ $3 \times 700 = 2,100 \quad 7 \times 300 = 2,100$
Mental strategies Partition 2 or 3-digit numbers to multiply using informal methods.	<p>... tens multiplied by ... is equal to ... tens. ... ones multiplied by ... is equal to ... ones.</p> $3 \times 26 = 60 + 18 = 78$

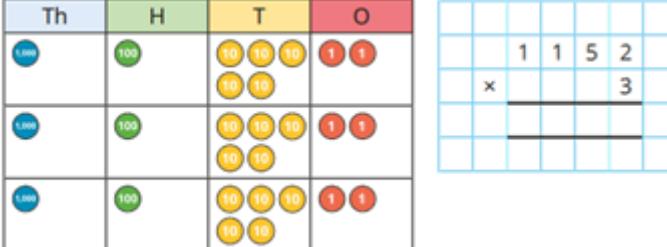

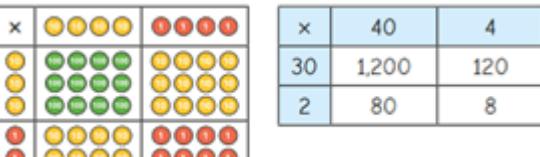

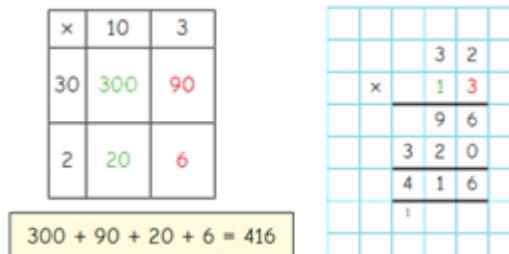

Multiplication

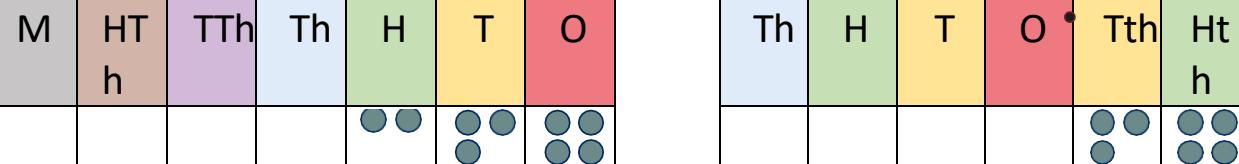

Progression of skills	Key representations
<p>Multiply a 2 or 3-digit number by a 1-digit number</p> <p>The short multiplication method is introduced for the first time, initially in an expanded form.</p>	<p>To multiply a 2-digit number by ... , I multiply the ones by ... and the tens by ...</p> <p>To multiply a 3-digit number by ... , I multiply the ones by ... , the tens by ... and the hundreds by ...</p> <p></p>
<p>Scaling</p> <p>Children focus on multiplication as scaling (... times the size).</p>	<p>... is ... times the size of ...</p> <p></p> <p>A computer mouse costs £7 A keyboard costs 6 times as much.</p> <p>A red ribbon is 6 cm. A yellow ribbon is 7 times as long.</p>
<p>Correspondence problems</p> <p>Encourage children to use tables to show all the different possible combinations.</p>	<p>For every ... , there are ... possibilities.</p> <p>There are ... \times ... possibilities altogether.</p> <p>A pizza company offers a choice of 5 toppings and 3 bases.</p> <p>$5 \times 3 = 15$</p> <p></p>

Multiplication

<p>Year 5</p>	<ul style="list-style-type: none"> Identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers Recognise and use square numbers and cube numbers, and the notation for squared (2) and cubed (3) Multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers. Multiply numbers mentally drawing upon known facts. Multiply whole numbers and those involving decimals by 10, 100 and 1000 Multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams.
<p>Progression of skills</p> <p>Multiples and factors Encourage children to notice patterns and make links with known facts.</p>	<p>Key representations</p> <p>... is a multiple of ... because $\dots \times \dots = \dots$</p>  <p>... is a factor of ... because $\dots \times \dots = \dots$</p>   <p>1, 2, 4 and 8 are factors of 8</p> <p>The common factors of ... and ... are ...</p> <p>Factors of 20 Factors of 12</p>

<p>Find the whole</p> <p>Children multiply to find the whole from a given part.</p>	<p>If $\frac{1}{\square}$ is ... , then the whole is ... \times ...</p> <p>$\frac{1}{5}$ of ___ = 6</p> <p>?</p>  <p>$5 \times 6 = 30$</p> <p>$\frac{1}{5}$ of 30 = 6</p> <p>If $\frac{\square}{\square}$ is ... , then $\frac{1}{\square}$ is ... and the whole is ... \times ...</p> <p>$\frac{4}{7}$ of ___ = 24</p> <p>?</p>  <p>$7 \times 6 = 42$</p> <p>$\frac{4}{7}$ of 42 = 24</p>

Multiplication

Year 6

- Identify common factors and common multiples.
- Multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication.
- Multiply numbers by 10, 100 and 1,000
- Multiply one-digit numbers with up to two decimal places by whole numbers.
- Use their knowledge of the order of operations to carry out calculations involving the 4 operations.
- Multiply simple pairs of proper fractions, writing the answer in its simplest form.
- Solve problems involving the relative sizes of two quantities where missing values can be found by using integer multiplication and division facts.
- Solve problems involving the calculation of percentages.

Progression of skills

Key representations

Multiply numbers up to 4 digits by a 2-digit number

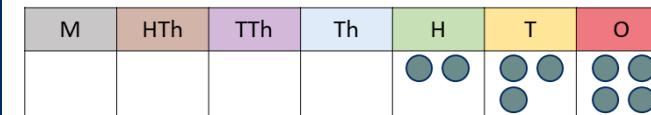

To multiply by a 2-digit number, first multiply by the ones, then multiply by the tens and then find the total.

$$\begin{array}{r}
 1 & 2 & 0 & 7 \\
 \times & & 3 & 6 \\
 \hline
 1 & 2 & 0 & 7 \\
 + & 3 & 6 & 2 & 1 & 0 \\
 \hline
 4 & 3 & 4 & 5 & 2 \\
 \hline
 1
 \end{array}
 \begin{array}{l}
 (1,207 \times 6) \\
 (1,207 \times 30)
 \end{array}$$

Multiply by 10, 100 and 1,000

Some children may over-generalise that multiplying by a power of 10 always results in adding zeros.

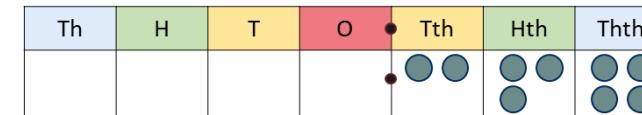

To multiply by 10/100/1,000, I move all the digits ... places to the left.
... is 10/100/1,000 times the size of ...

$$234 \times 10 = 2,340$$

$$234 \times 100 = 23,400$$

$$234 \times 1,000 = 234,000$$

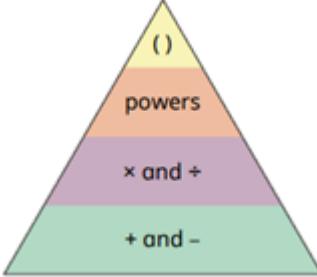

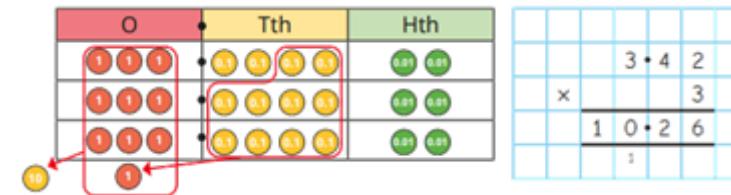

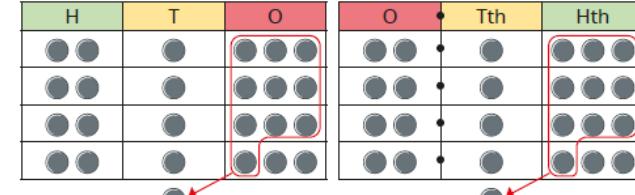

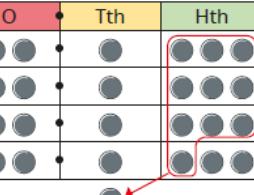

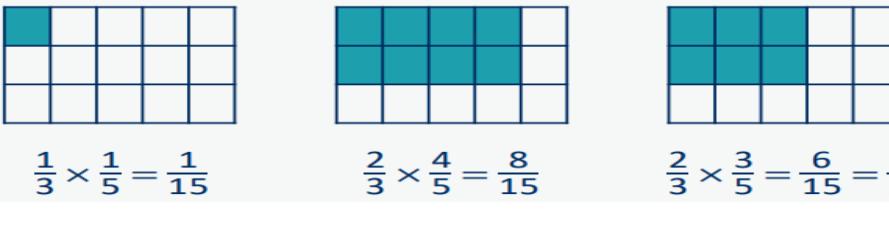

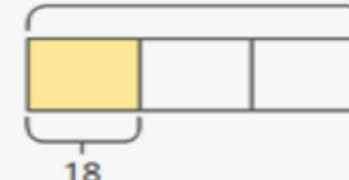

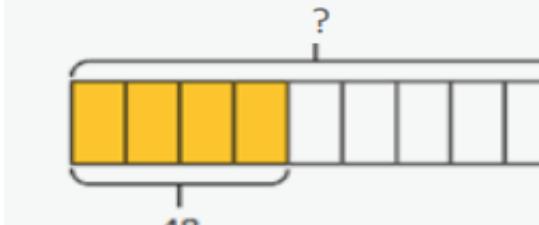

$$0.234 \times 10 = 2.34$$

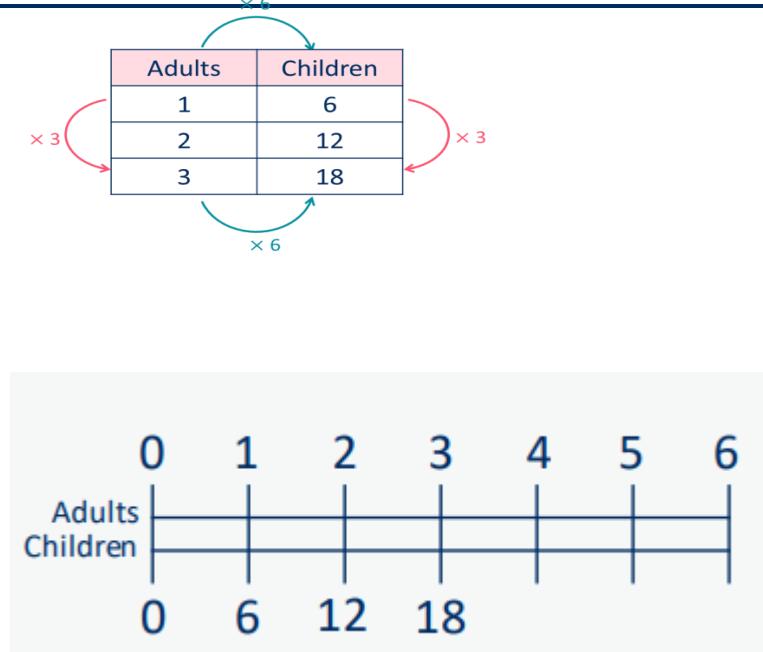

$$0.234 \times 100 = 23.4$$

$$0.234 \times 1,000 = 234$$

Reception	<ul style="list-style-type: none"> Have a deep understanding of number to 10, including the composition of each number. Subitise (recognise quantities without counting) up to 5 Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 and some number bonds to 10, including double facts. Explore and represent patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed equally.
Progression of skills	Key representations
Sharing Provide practical activities such as sharing items during snack time. Encourage children to check whether items have been shared fairly (equally).	<p>There are ... altogether. They are shared equally between ... groups.</p> 
Grouping Provide opportunities to make equal groups when tidying up or during snack time. Encourage children to check that each group has the same amount.	<p>There are ... groups of ... There are ... altogether.</p> 

Year 1	<ul style="list-style-type: none"> Solve simple one-step problems involving division, using concrete objects, pictorial representations and arrays with the support of the teacher. Recognise, find and name a half as one of two equal parts of a quantity. Recognise, find and name a quarter as one of four equal parts of an object, shape or quantity.
Progression of skills	Key representations
<p>Make equal groups - grouping</p> <p>Encourage children to physically move objects into equal groups. They can also circle equal groups when using pictures.</p>	<p>There are ... altogether. How many groups of ... can you make?</p>  <p>Circle groups of 2</p> <p>There are ... groups of 2</p>  <p>Take ... cubes. Make equal groups.</p>  <p>There are ... groups of ...</p>
<p>Make equal groups – sharing</p> <p>Encourage children to check that the objects have been shared fairly and each group is the same.</p>	<p>... have been shared equally between... There are ... on/in each ...</p>   <p>Take ... cubes. Share them between ...</p>  <p>12 shared between ... is ...</p>

Progression of skills	Key representations
<p>Find a half</p> <p>Start with practical opportunities to share a quantity into 2 groups. Progress to circling half of the objects in a picture and then to finding the whole from a given half.</p>	<p>To find half, I need to share into 2 equal groups.</p>  <p>There are ... in each group.</p> <p>Half of ... is ...</p>  <p>If ... is half, what is the whole?</p>  <p>4 is half of ...</p>
<p>Find a quarter</p> <p>Start with practical opportunities to share a quantity into 4 groups. Progress to using pictures or bar models to find a quarter and then to finding the whole from a given quarter.</p>	<p>To find a quarter, I need to share into 4 equal groups.</p>  <p>There are ... in each group.</p> <p>A quarter of ... is ...</p>  <p>If ... is one quarter, what is the whole?</p>  <p>3 is one quarter of ...</p>

Year 2	<ul style="list-style-type: none"> Recall and use division facts for the 2, 5 and 10 multiplication tables. Calculate mathematical statements for division within the multiplication tables and write them using the division (\div) and equals ($=$) signs. Recognise, find, name and write fractions $\frac{1}{3}$, $\frac{1}{4}$, $\frac{1}{4}$, $\frac{2}{4}$ and $\frac{3}{4}$ of a quantity.
Progression of skills	Key representations
Divide by 2 Encourage children to compare the grouping and sharing structures of division and to make links with times-table facts and halving. <i>Use counters and arrays as the primary teaching strategy.</i>	<p>There are ... equal groups of 2 $\dots \div 2 = \dots$</p>  $4 \times 2 = 8$ $8 \div 2 = 4$  <p>... shared equally between 2 is ... Half of ... is ... $\dots \div 2 = \dots$</p>  $4 \times 2 = 8$ $8 \div 2 = 4$ 

Divide by 10

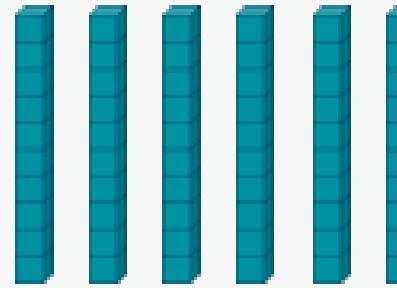

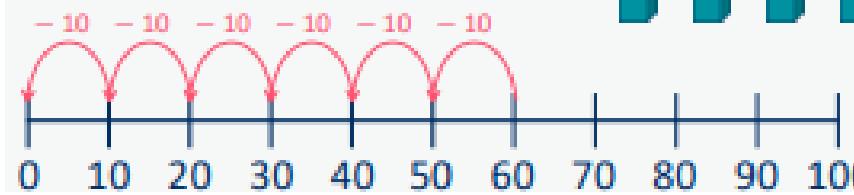

Encourage children to compare the grouping and sharing structures of division and to make links with times-table facts.

There are ... equal groups of 10

$$\dots \div 10 = \dots$$

$$6 \times 10 = 60$$

$$60 \div 10 = 6$$

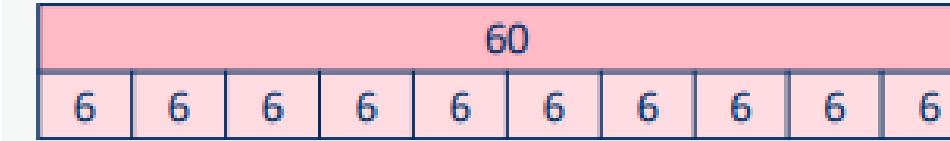

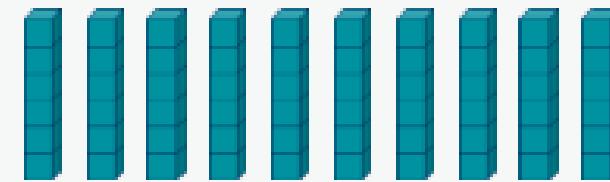

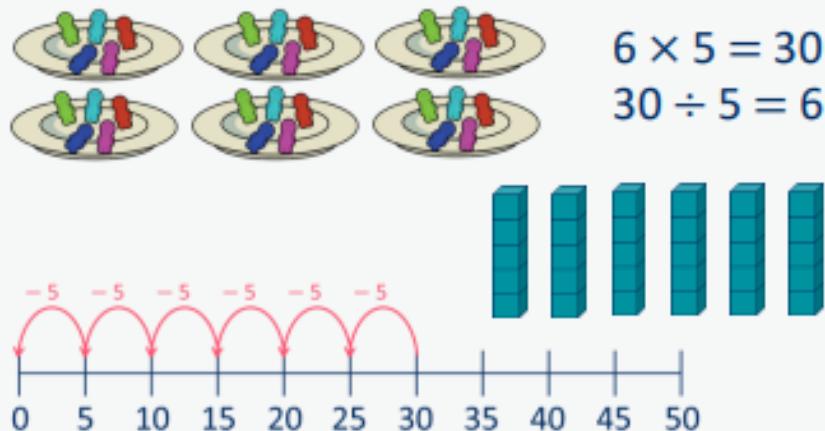

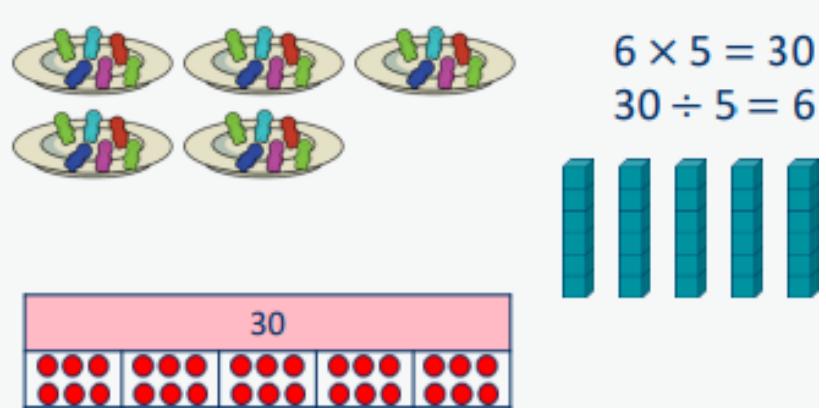

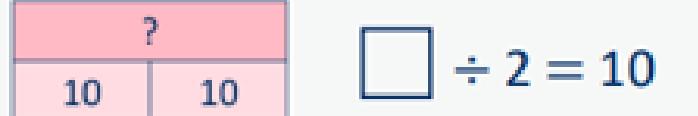

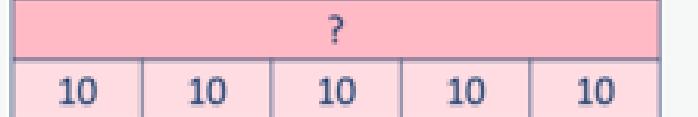

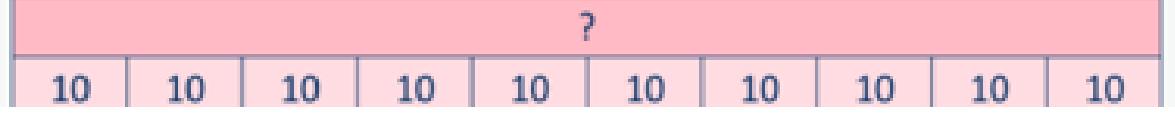

... shared equally between 10 is ...

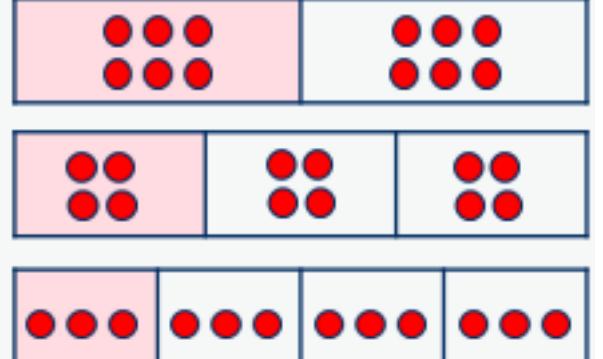

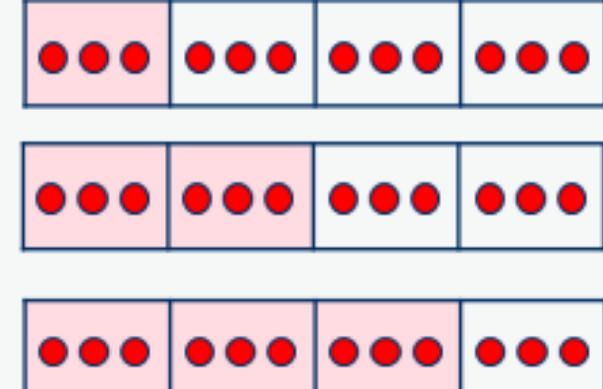

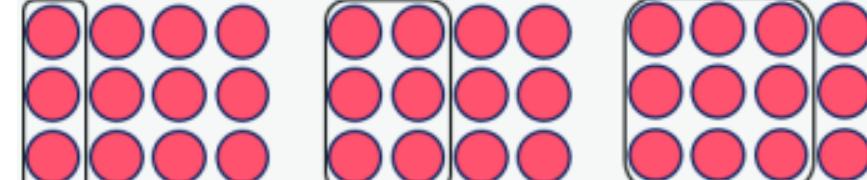

$$\dots \div 10 = \dots$$

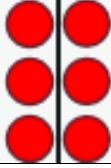

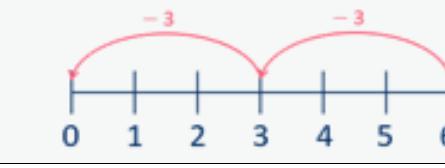

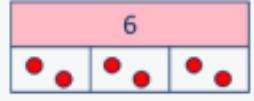

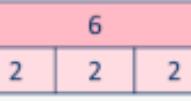

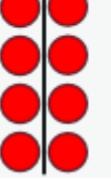

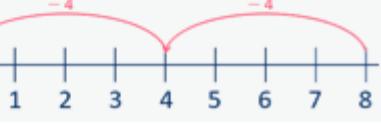

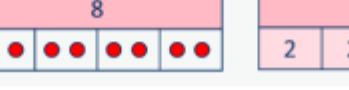

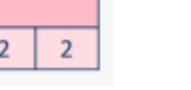

$$6 \times 10 = 60$$

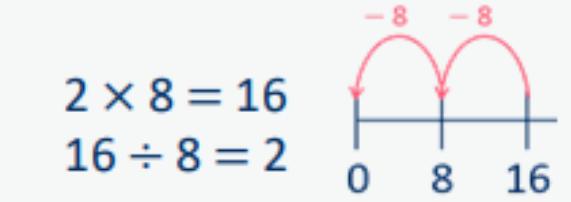

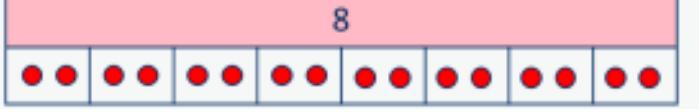

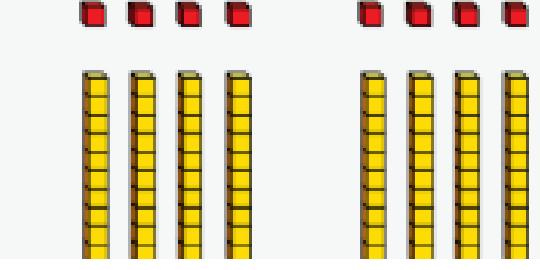

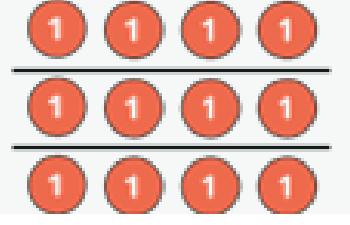

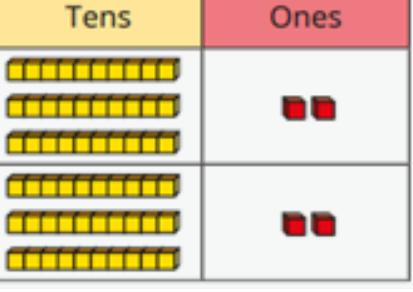

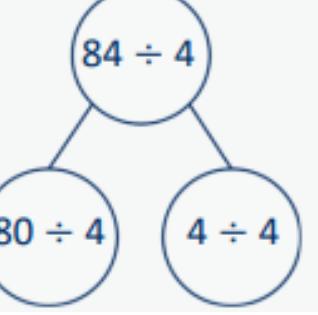

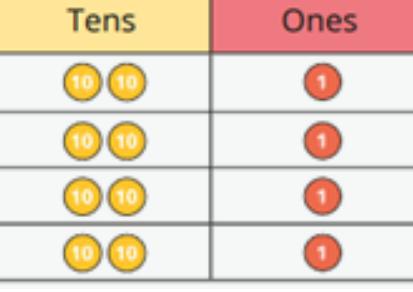

$$60 \div 10 = 6$$

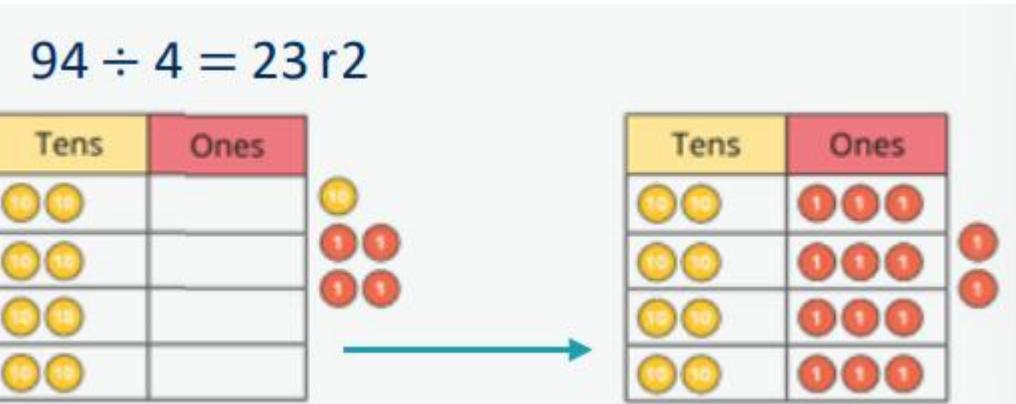

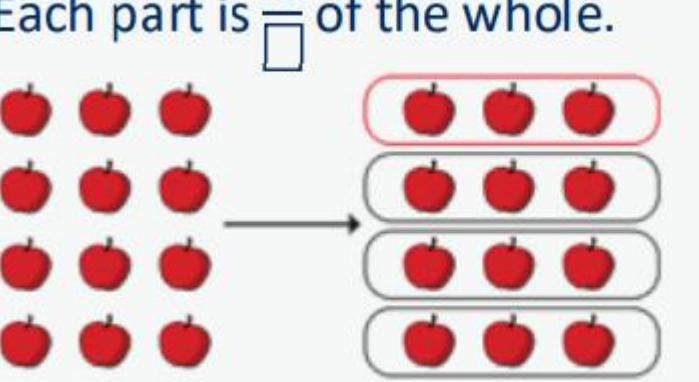

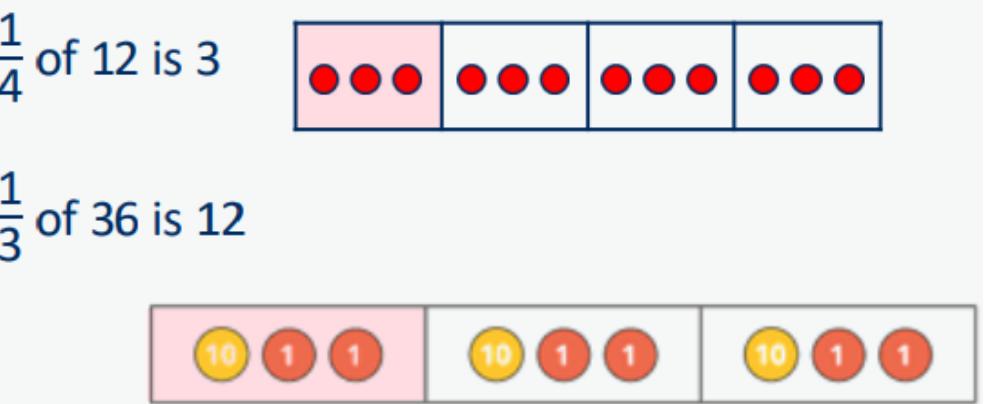

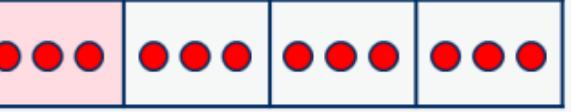

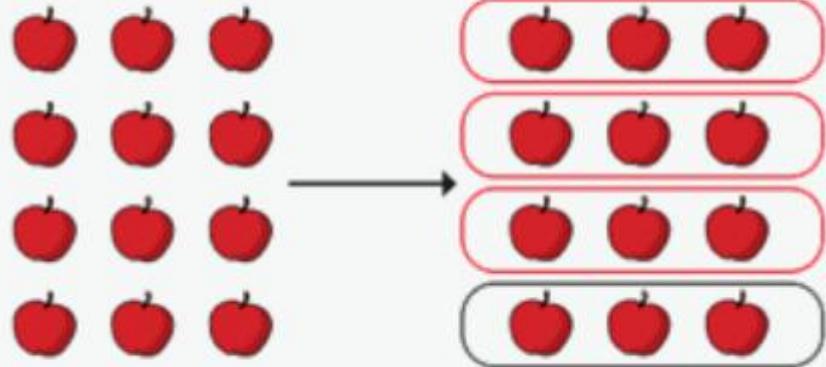

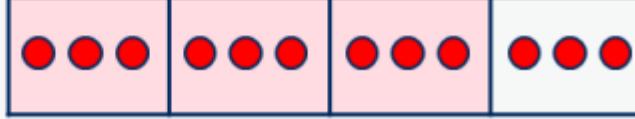

Progression of skills	Key representations
<p>Divide by 5</p> <p>Encourage children to compare the grouping and sharing structures of division and to make links with times-table facts.</p>	<p>There are ... equal groups of 5 ... $\div 5 = \dots$</p>  <p>$6 \times 5 = 30$ $30 \div 5 = 6$</p> <p>... shared equally between 5 is $\div 5 = \dots$</p>  <p>$6 \times 5 = 30$ $30 \div 5 = 6$</p>
<p>Missing numbers</p> <p>Bar models are useful to show the link between multiplication and division.</p>	 <p>I know this because: $10 \times 2 = \boxed{}$</p>  <p>I know this because: $10 \times 5 = \boxed{}$</p>  <p>I know this because: $10 \times 10 = \boxed{}$</p>

Progression of skills	Key representations
<p>Unit fractions</p> <p>In Y2 the focus is on finding $\frac{1}{2}$, $\frac{1}{4}$ and $\frac{1}{3}$</p> <p>Bar models are useful to show the link between division and finding a fraction</p>	<p>The objects have been shared fairly into ... groups.</p> <p>$\frac{1}{\square}$ of ... is ...</p>  <p>There are ... equal parts. There is ... part circled. $\frac{1}{\square}$ is circled.</p> 
<p>Non-unit fractions</p> <p>In Y2 the focus is on finding $\frac{2}{4}$ and $\frac{3}{4}$</p> <p>Prompt children to notice that $\frac{2}{4}$ is equivalent to $\frac{1}{2}$</p>	<p>The objects have been shared fairly into ... groups.</p> <p>$\frac{\square}{\square}$ of ... is ...</p>  <p>There are ... equal parts. There are ... parts circled. $\frac{\square}{\square}$ is circled.</p> 

Year 3	<ul style="list-style-type: none"> Recall and use division facts for the 3, 4 and 8 multiplication tables. Write and calculate mathematical statements for division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods. Recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small denominators.
Progression of skills	Key representations
Divide by 3 <p>Encourage children to compare the grouping and sharing structures of division and to make links with times-table facts.</p>	<p>There are ... groups of 3 in ... $\dots \div 3 =$</p> <p> $2 \times 3 = 6$ $6 \div 3 = 2$</p> <p> </p> <p>... has been shared equally into 3 equal groups. $\dots \div 3 =$</p> <p> $2 \times 3 = 6$ $6 \div 3 = 2$</p> <p>  </p>
Divide by 4 <p>Encourage children to compare the grouping and sharing structures of division and to make links with times-table facts.</p>	<p>There are ... groups of 4 in ... $\dots \div 4 =$</p> <p> $2 \times 4 = 8$ $8 \div 4 = 2$</p> <p> </p> <p>... has been shared equally into 4 equal groups. $\dots \div 4 =$</p> <p> $2 \times 4 = 8$ $8 \div 4 = 2$</p> <p>  </p>

Progression of skills	Key representations		
Divide by 8 Encourage children to compare the grouping and sharing structures of division and to make links with times-table facts.	There are ... groups of 8 in ... $\dots \div 8 =$  $2 \times 8 = 16$ $16 \div 8 = 2$  	\dots has been shared equally into 8 equal groups. $\dots \div 8 =$    $2 \times 8 = 16$ $16 \div 8 = 2$	
Related facts Link to known times-table facts.	$\dots \div \dots$ is equal to ..., so ... tens $\div \dots$ is equal to ... tens.     		
Divide a 2-digit number by a 1-digit number - no exchange Partition into tens and ones to divide and then recombine.	\dots tens divided by ... is equal to ... tens. \dots ones divided by ... is equal to ... ones.  $60 \div 2 = 30$ $4 \div 2 = 2$ $64 \div 2 = 32$  		

Progression of skills	Key representations
<p>Divide a 2-digit number by a 1-digit number - with remainders</p> <p>Encourage children to partition numbers flexibly to help them to divide more efficiently</p>	<p>... tens divided by ... is equal to ... tens. ... ones divided by ... is equal to ... ones.</p> <p></p> $96 \div 4$ $80 \div 4 = 20$ $16 \div 4 = 4$ $96 \div 4 = 24$ <p></p> <p>There are ... groups of ... There are ... remaining.</p>
<p>Unit fractions of a set of objects</p> <p>Bar models are useful to show the link between division and fractions, for example, dividing by 3 and finding a third.</p>	<p>The whole is divided into ... equal parts. Each part is $\frac{1}{\square}$ of the whole.</p> <p></p> <p>$\frac{1}{4}$ of 12 apples is 3 apples.</p> <p></p> <p>One ... of ... is ...</p> <p>$\frac{1}{4}$ of 12 is 3 </p> <p>$\frac{1}{3}$ of 36 is 12 </p>

Progression of skills	Key representations
<p>Non-unit fractions of a set of objects</p> <p>Bar models are a useful representation and show the links with division and multiplication.</p>	<p>The whole is divided into ... equal parts.</p> <p>Each part is $\frac{1}{\square}$ of the whole.</p>  <p>$\frac{3}{4}$ of 12 apples is 9 apples.</p> <p>$\frac{1}{\square}$ of ... is ..., so $\frac{\square}{\square}$ of ... is ...</p> <p>$\frac{3}{4}$ of 12 is 9</p>  <p>$\frac{2}{3}$ of 36 is 24</p> 

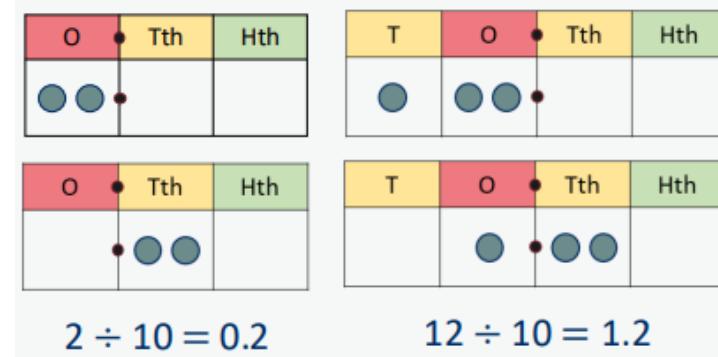

Year 4	<p>Recall division facts for multiplication tables up to 12×12</p> <ul style="list-style-type: none"> • Use place value, known and derived facts to divide mentally, including: dividing by 1 • Find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as ones, tenths and hundredths. 		
Progression of skills	<p>Key representations</p>		
<p>Division facts to 12×12</p> <p>Encourage children to compare the grouping and sharing structures of division and to make links with times-table facts</p>	<p>There are ... groups of ... in ... $\dots \div \dots =$</p>	<p>... has been shared equally into ... equal groups. $\dots \div \dots =$</p>	<p>$2 \times 6 = 12$ $12 \div 6 = 2$</p>
<p>Divide a number by 1 and itself</p> <p>Children may try to divide a number by zero and it should be highlighted that this is not possible.</p>	<p>When I divide a number by 1, the number remains the same.</p> <p>5 shared between 1 is 5</p> <p>There are 5 groups of 1 in 5</p>	<p>When I divide a number by itself, the answer is 1</p> <p>5 shared between 5 is 1</p> <p>There is 1 group of 5 in 5</p>	

Progression of skills	Key representations																											
Related facts Link to known times-table facts	$\dots \div \dots$ is equal to ... so ... tens $\div \dots$ is equal to ... tens and ... hundreds $\div \dots$ is equal to ... hundreds.																											
			$21 \div 7 = 3$ $210 \div 7 = 30$ $2,100 \div 7 = 300$	$21 \div 3 = 7$ $210 \div 3 = 70$ $2,100 \div 3 = 700$																								
Divide a 2 or 3-digit number by a 1-digit number Progress from divisions with no exchange, to divisions with exchange and then divisions with remainders	<p>I can partition ... into ... tens and ... ones.</p> $84 \div 4$ $80 \div 4 = 20$ $4 \div 4 = 1$ $84 \div 4 = 21$ <table border="1"> <tr> <th>Tens</th> <th>Ones</th> </tr> <tr> <td>10 10</td> <td>1</td> </tr> </table>		Tens	Ones	10 10	1	10 10	1	10 10	1	10 10	1	<p>I cannot share the hundreds/tens equally, so I need to exchange 1 ... for 10 ...</p> $435 \div 3$ $300 \div 3 = 100$ $120 \div 3 = 40$ $15 \div 3 = 5$ $435 \div 3 = 145$ <table border="1"> <tr> <th>Hundreds</th> <th>Tens</th> <th>Ones</th> </tr> <tr> <td>100</td> <td>10 10 10</td> <td>1 1 1 1 1</td> </tr> <tr> <td>100</td> <td>10 10 10</td> <td>1 1 1 1 1</td> </tr> <tr> <td>100</td> <td>10 10 10</td> <td>1 1 1 1 1</td> </tr> <tr> <td>100</td> <td>10 10 10</td> <td>1 1 1 1 1</td> </tr> </table>	Hundreds	Tens	Ones	100	10 10 10	1 1 1 1 1	100	10 10 10	1 1 1 1 1	100	10 10 10	1 1 1 1 1	100	10 10 10	1 1 1 1 1

Divide by 10 and 100

Encourage children to notice that dividing by 100 is the same as dividing by 10 twice.

When I divide by 10, the digits move 1 place value column to the right.
... is one-tenth the size of ...

Progression of skills

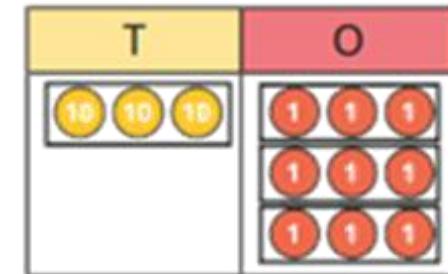

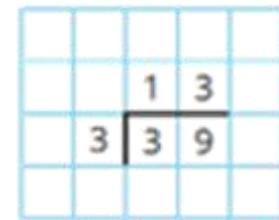

Divide a 2 or 3-digit number by a 1-digit number

Progress from divisions with no exchange, to divisions with exchange and then divisions with remainders.

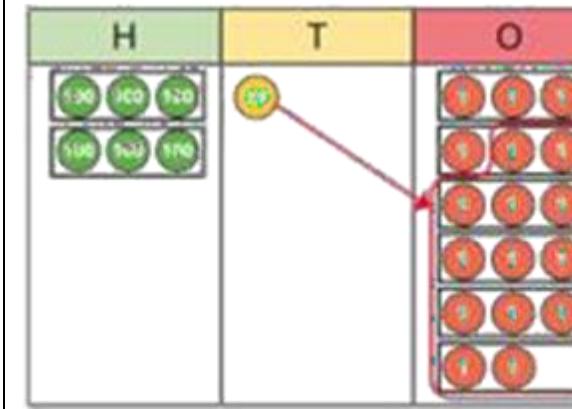

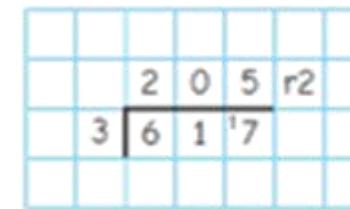

Following on from the previous step – This needs to now move on to the more formal written method which will become a focus within Y4 arithmetic sessions.

Key representations

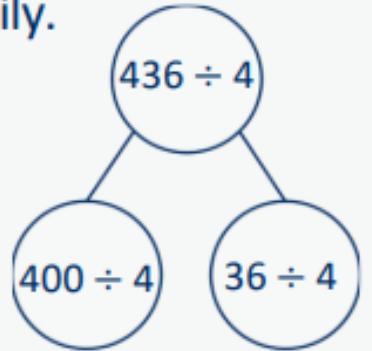

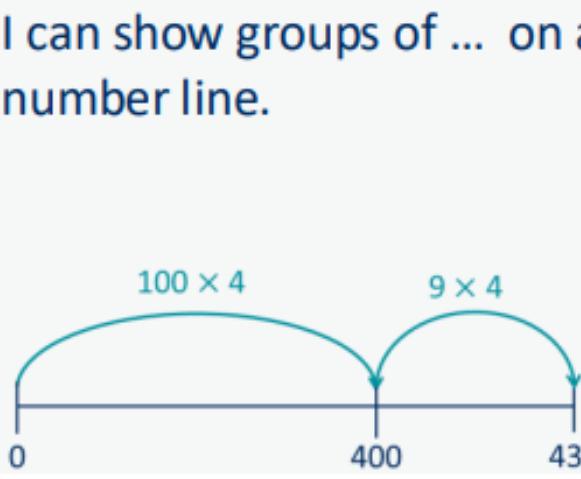

No exchange

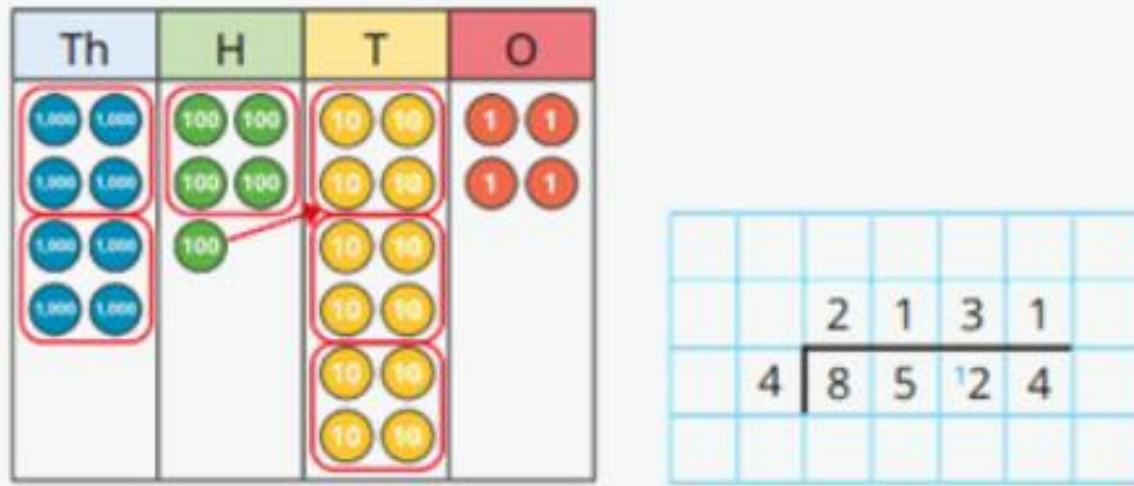

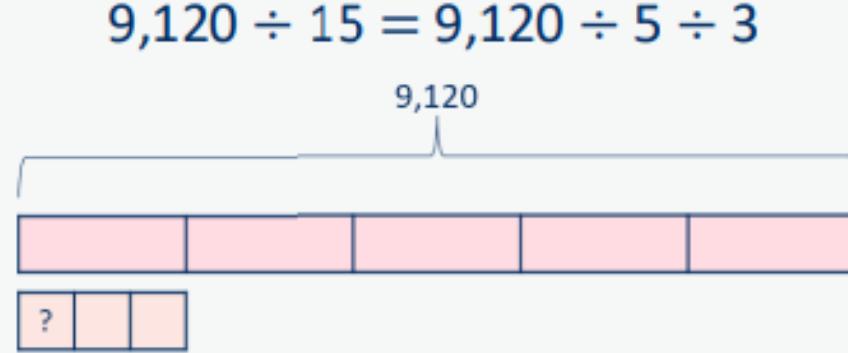

Exchange

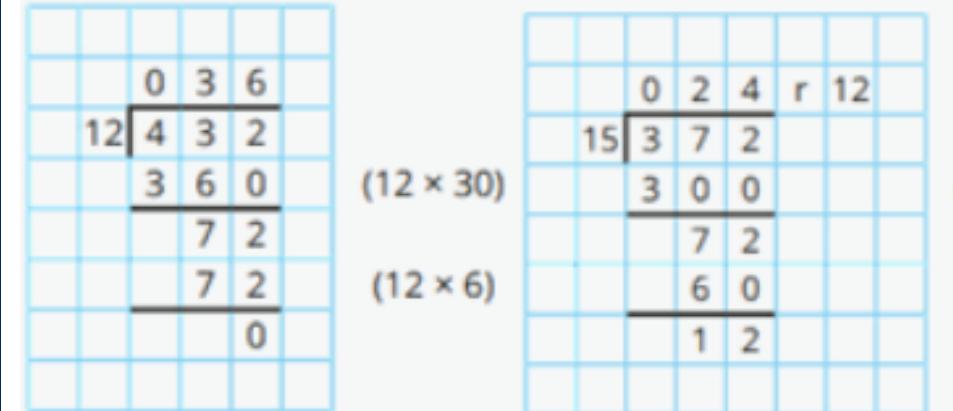

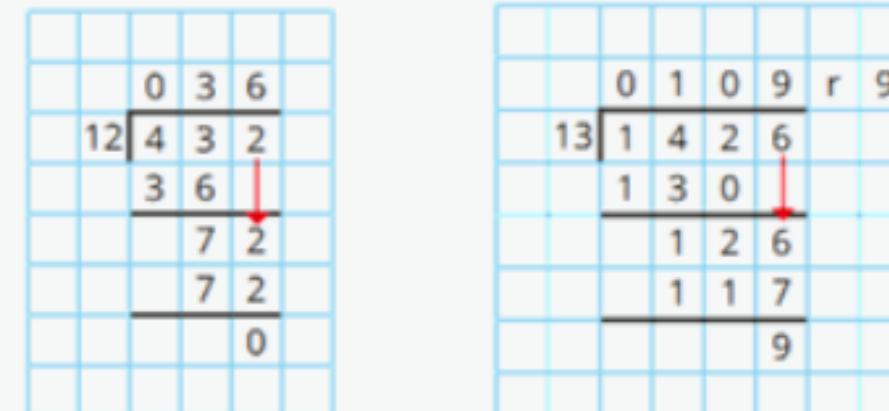

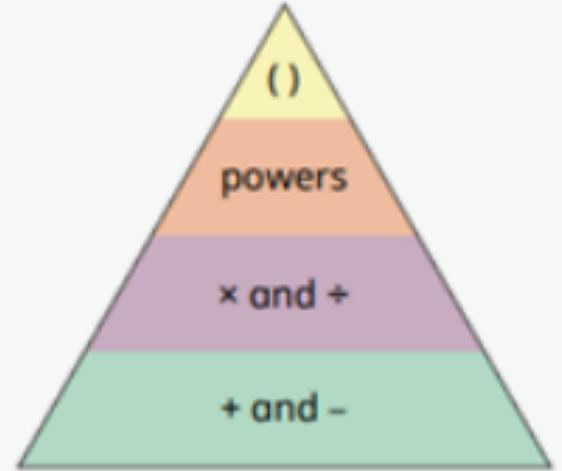

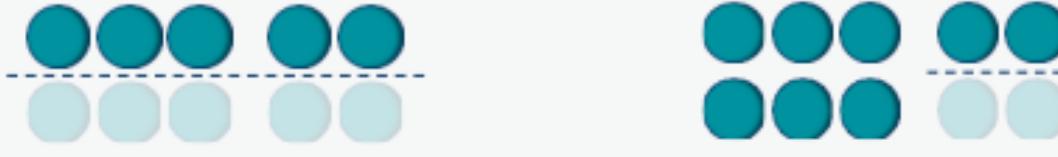

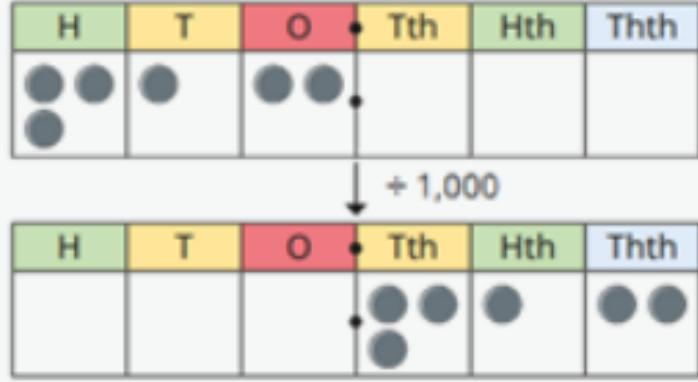

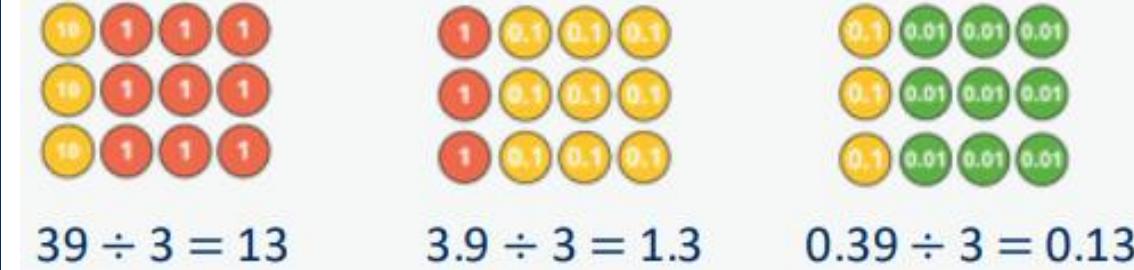

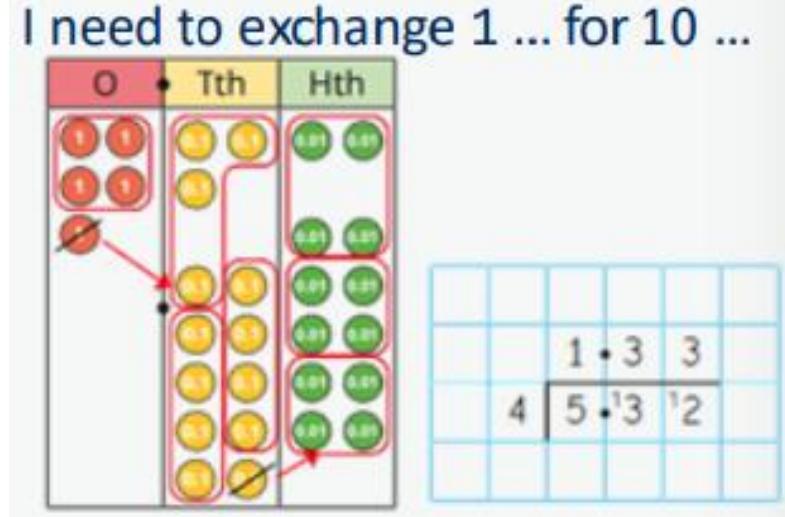

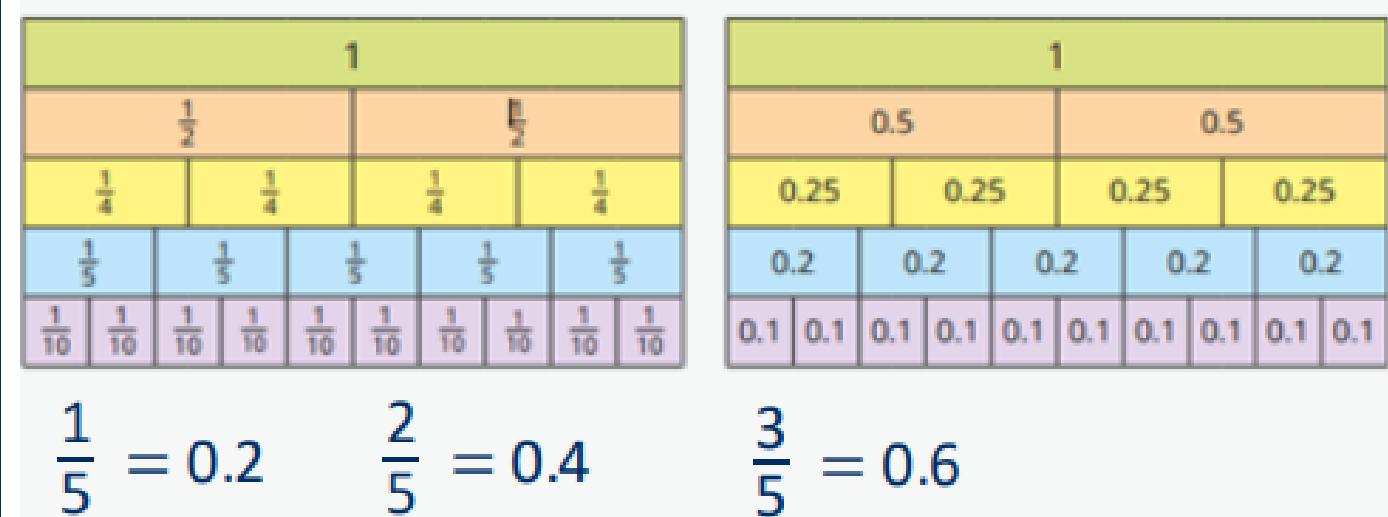

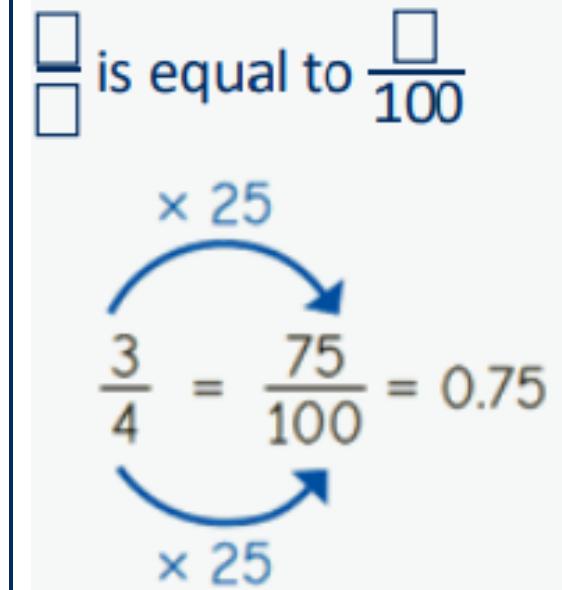

Division

Year 5	<ul style="list-style-type: none"> Divide numbers mentally drawing upon known facts. Divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context. Divide whole numbers and those involving decimals by 10, 100 and 1,000 																		
Progression of skills	Key representations																		
Mental strategies	<p>I can partition ... into ... and ... to help me to divide more easily.</p>  <p>I can show groups of ... on a number line.</p>  <p>To divide by ..., I can divide by ... and then divide the result by ...</p> $436 \div 4 = 436 \div 2 \div 2$ $436 \div 2 = 218$ $218 \div 2 = 109$																		
Efficient Rules of Divisibility <p>Recognise divisibility by 2, 5 or 10 by looking at the ones digits of a number.</p> <p>Recognise a number is divisible by 4 if halving the number gives an even result and the corresponding rule for divisibility by 8.</p> <p>Recognise numbers are divisible by 3 if the sum of their digits is divisible by 3.</p> <p>Recognise numbers are divisible by 9 if the sum of their digits is divisible by 9.</p>	<p>DIVISIBILITY RULES</p> <table border="1"> <thead> <tr> <th colspan="2">A NUMBER IS DIVISIBLE BY</th> </tr> </thead> <tbody> <tr> <td>2</td> <td>if The last digit is even (ending in 0,2,4,6,8)</td> </tr> <tr> <td>3</td> <td>if The sum of the digits is divisible by 3</td> </tr> <tr> <td>4</td> <td>if The last 2 digits are divisible by 4</td> </tr> <tr> <td>5</td> <td>if The last digit is a 0 or 5</td> </tr> <tr> <td>6</td> <td>if The number is divisible by 2 and 3</td> </tr> <tr> <td>8</td> <td>if The last 3 digits are divisible by 8</td> </tr> <tr> <td>9</td> <td>if The sum of the digits is divisible by 9</td> </tr> <tr> <td>10</td> <td>if The last digit is a 0</td> </tr> </tbody> </table> <p>https://everydaychaosandcalm.com/</p> <p>This to be a focus for Y5 during arithmetic sessions.</p>	A NUMBER IS DIVISIBLE BY		2	if The last digit is even (ending in 0,2,4,6,8)	3	if The sum of the digits is divisible by 3	4	if The last 2 digits are divisible by 4	5	if The last digit is a 0 or 5	6	if The number is divisible by 2 and 3	8	if The last 3 digits are divisible by 8	9	if The sum of the digits is divisible by 9	10	if The last digit is a 0
A NUMBER IS DIVISIBLE BY																			
2	if The last digit is even (ending in 0,2,4,6,8)																		
3	if The sum of the digits is divisible by 3																		
4	if The last 2 digits are divisible by 4																		
5	if The last digit is a 0 or 5																		
6	if The number is divisible by 2 and 3																		
8	if The last 3 digits are divisible by 8																		
9	if The sum of the digits is divisible by 9																		
10	if The last digit is a 0																		

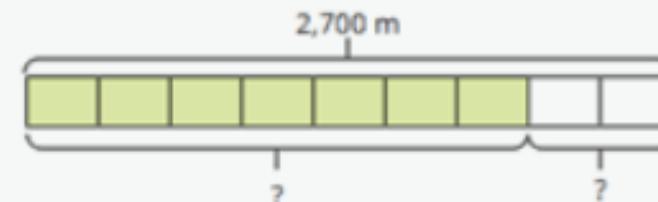

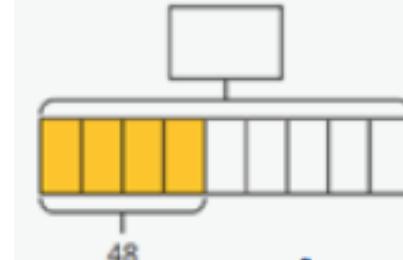

Progression of skills	Key representations
Divide numbers up to 4 digits by a 1-digit number The short division method is introduced for the first time.	<p>There are ... groups of ... hundreds/tens/ones/ in ... I can exchange 1 ... for 10 ...</p>
Divide by 10, 100 and 1,000 Encourage children to notice that dividing by 100 is the same as dividing by 10 twice, and that dividing by 1,000 is the same as dividing by 10 three times.	<p>To divide by 10/100/1,000, I move all the digits ... places to the right. ... is one-tenth/one-hundredth/one-thousandth the size of ...</p> <p>$120 \div 10 = 12$</p> <p>$120 \div 100 = 1.2$</p> <p>$120 \div 1,000 = 0.12$</p>
Fraction of an amount Bar models support children to understand that to find a fraction of an amount, we divide by the denominator and multiply by the numerator.	<p>To find $\frac{\square}{\square}$ of ... , I need to divide by ... and multiply by ...</p> <p>$\frac{1}{5}$ of 20 =</p> <p>$\frac{3}{5}$ of 20 =</p> <p>$\frac{1}{4}$ of 84 =</p> <p>$\frac{3}{4}$ of 84 =</p> <p>If $\frac{1}{\square}$ is ... , then the whole is ... \times ...</p> <p>$\frac{1}{5}$ of ___ = 6</p> <p>$\frac{4}{7}$ of ___ = 24</p>

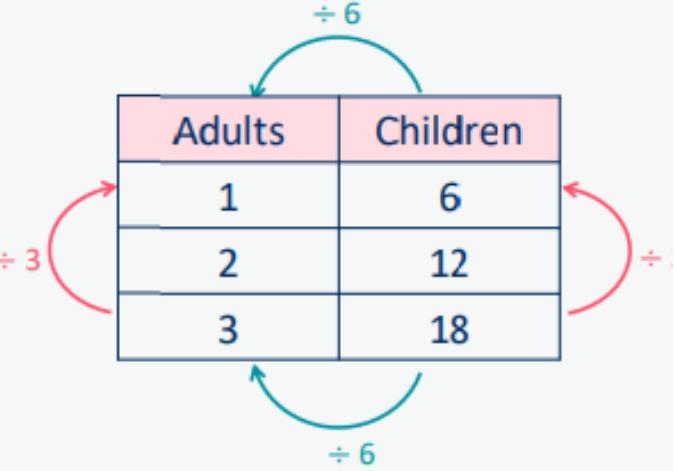

<p>Year 6</p>	<ul style="list-style-type: none"> Perform mental calculations, including with mixed operations and large numbers. Divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context. Divide numbers up to 4 digits by a two-digit number using the formal written method of short division where appropriate, interpreting remainders according to the context. Divide numbers by 10, 100 and 1,000 giving answers up to three decimal places. Use written division methods in cases where the answer has up to two decimal places. Associate a fraction with division and calculate decimal fraction equivalents. Divide proper fractions by whole numbers [for example $\frac{1}{3} \div 2 = \frac{1}{6}$] Solve problems involving the calculation of percentages.
<p>Progression of skills</p>	<p>Key representations</p>
<p>Short division</p> <p>Encourage children to interpret remainders in context, for example knowing that “remainder 1” could mean complete boxes with 1 left over so 5 boxes will be needed.</p>	<p>There are ... groups of ... hundreds/tens/ones/ in ... I can exchange 1 ... for 10 ...</p> 
<p>Mental strategies</p> <p>Include partitioning and number line strategies outlined in Y5 as well as division using factors</p>	<p>To divide by ... , I can first divide by ... and then divide the answer by ...</p> <p>$240 \div 60 = 240 \div 10 \div 6$</p> <p>$240 \rightarrow \div 10 \rightarrow \square \rightarrow \div 6 \rightarrow \square$</p> <p>$480 \div 24 = 480 \div 4 \div 6$</p> <p>$480 \rightarrow \div 4 \rightarrow \square \rightarrow \div 6 \rightarrow \square$</p> <p>$9,120 \div 15 = 9,120 \div 5 \div 3$</p> 

Progression of skills	Key representations			
Long division <p>The long division method is introduced for the first time. Two alternative methods are shown.</p>	Method 1 	Method 2 		
Order of operations <p>Calculations in brackets should be done first, then powers. Multiplication and division should be performed before addition and subtraction.</p>	<p>... has greater priority than ..., so the first part of the calculation I need to do is ...</p>   <p>$(6 + 4) \div 2 = 5$</p> <p>$6 + 4 \div 2 = 8$</p>			
Divide by 10, 100 and 1,000 <p>Encourage children to notice that dividing by 100 is the same as dividing by 10 twice, and that dividing by 1,000 is the same as dividing by 10 three times</p>	<p>To divide by ..., I move the digits ... places to the right.</p>  <p>$312 \div 10 = 31.2$</p> <p>$312 \div 100 = 3.12$</p> <p>$312 \div 1,000 = 0.312$</p> <p>$906 \div 10 = 90.6$</p> <p>$906 \div 100 = 9.06$</p> <p>$906 \div 1,000 = 0.906$</p>			

Progression of skills	Key representations
Divide decimals by integers This is the first time children divide decimals by numbers other than 10, 100 or 1,000	<p>I know that ... \div ... = ..., so I also know that ... \div ... = ...</p>  <p>$39 \div 3 = 13$ $3.9 \div 3 = 1.3$ $0.39 \div 3 = 0.13$</p> <p>I need to exchange 1 ... for 10 ...</p> 
Decimal and fraction equivalents	<p>The fraction ... is equivalent to the decimal ...</p>  <p>$\frac{1}{5} = 0.2$ $\frac{2}{5} = 0.4$ $\frac{3}{5} = 0.6$</p> <p>\square is equal to $\frac{\square}{100}$</p> 

Division

Progression of skills	Key representations	
Divide a fraction by an integer This is the first time children divide fractions by an integer.	<p>... ones divided by 2 is ... ones so ... sevenths divided by 2 is ... sevenths.</p>  $\frac{4}{7} \div 4 = \frac{1}{7}$  $\frac{4}{7} \div 2 = \frac{2}{7}$	<p>I am dividing by ... , so I can split each part into ... equal parts.</p>  $\frac{1}{3} \div 2 = \frac{1}{6}$  $\frac{2}{3} = \frac{4}{6}$ so $\frac{2}{3} \div 4 = \frac{4}{6} \div 4 = \frac{1}{6}$
Fraction of an amount Children divide and multiply to find fractions of an amount. Bar models can still be used to support understanding where needed.	<p>To find $\frac{1}{\square}$ I divide by ...</p> $\frac{1}{2} \text{ of } 36 = 36 \div 2$ $\frac{1}{12} \text{ of } 36 = 36 \div 12$	<p>If $\frac{1}{\square}$ is equal to ..., then $\frac{\square}{\square}$ are equal to ...</p>  $\frac{7}{9} \text{ of } 2,700 = \frac{1}{9} \text{ of } 2,700 \times 7$  $\frac{4}{9} \text{ of } \underline{\quad} = 48$

Progression of skills	Key representations																																	
<p>Calculate percentages</p> <p>Children first learn how to find 1%, 10%, 20%, 25% and 50% before using multiples of these amounts to find any percentage.</p>	<p>There are ... lots of ... % in 100% To find ... %, I need to divide by ...</p> <table border="1" data-bbox="851 467 1676 646"> <tr> <td colspan="4" style="text-align: center;">100%</td> </tr> <tr> <td colspan="2" style="text-align: center;">50%</td> <td colspan="2" style="text-align: center;">50%</td> </tr> <tr> <td style="text-align: center;">25%</td> <td style="text-align: center;">25%</td> <td style="text-align: center;">25%</td> <td style="text-align: center;">25%</td> </tr> </table> <p>50% of ... = ... \div 2 25% of ... = ... \div 4</p>	100%				50%		50%		25%	25%	25%	25%	<p>... % is made up of ... %, and ... %</p> <table border="1" data-bbox="1803 444 2979 579"> <tr> <td colspan="10" style="text-align: center;">100%</td> </tr> <tr> <td style="text-align: center;">10%</td> </tr> </table> <p>To find 30%, I can find 10% and then multiply it by 3 To find 23%, I can use 10% \times 2 and 1% \times 3 To find 99%, I can find 1%, then subtract from 100%</p>	100%										10%	10%	10%	10%	10%	10%	10%	10%	10%	10%
